

**SOUTH CAROLINA
DEPARTMENT OF TRANSPORTATION
ANNUAL FINANCIAL REPORT
FOR THE FISCAL YEAR ENDED
JUNE 30, 2019**

September 30, 2019

Members of the South Carolina Transportation Commission
South Carolina Department of Transportation
Columbia, South Carolina

This report on the audit of the financial statements of South Carolina Department of Transportation for the fiscal year ended June 30, 2019, was issued by Mauldin & Jenkins, LLC, Certified Public Accountants, under contract with the South Carolina Office of the State Auditor.

If you have any questions regarding this report, please let us know.

Respectfully submitted,

George L. Kennedy, III, CPA
State Auditor

Required Supplementary Information - Schedule of the South Carolina Department of Transportation's Actuarial Methods and Assumption Used to Determine The Contribution Rates	75
Required Supplementary Information - Schedule of the South Carolina Department of Transportation's proportionate share of the net OPEB liability- South Carolina Insurance Health Trust Fund	76
Required Supplementary Information - Schedule of the South Carolina Department of Transportation's Contributions - South Carolina Health Insurance Trust Fund	76
SUPPLEMENTARY INFORMATION	
Combining statement of changes in assets and liabilities – all agency funds	77 - 78

INDEPENDENT AUDITOR'S REPORT

Mr. George L. Kennedy, III, CPA
State Auditor
South Carolina Office of the State Auditor
Columbia, South Carolina

Members of the South Carolina Transportation Commission
South Carolina Department of Transportation
Columbia, South Carolina

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of the **South Carolina Department of Transportation** (the "Department"), a department of the State of South Carolina, as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the Department's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the Connector 2000 Association, Inc., which represents 100% of the assets, net position, and revenues of the discretely presented component unit. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for the Connector 2000 Association, Inc. is based solely on the report of the other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. The financial statements of the Connector 2000 Association, Inc. were not audited in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audit and the report of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of the South Carolina Department of Transportation as of June 30, 2019, and the respective changes in financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 1 to the financial statements, the Department's financial statements are intended to present the financial position and changes in financial position of only that portion of the governmental activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of the State of South Carolina that is attributable to the transactions of the Department. They do not purport to, and do not, present fairly the financial position of the State of South Carolina as of June 30, 2019, and the changes in its financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America. Our opinions are not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis (on pages 5 through 14), the budgetary comparison schedule (on page 70), the Schedules of the Department's Proportionate Share of the Net Pension Liability (on page 73), the Schedules of the Department's Pension Contributions (on page 74), the Schedule of the Department's Proportionate Share of the Net OPEB Liability (on page 75), and the Schedule of the Department's OPEB Contributions (on page 76), be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We and other auditors have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Department's basic financial statements. The combining statement of changes in assets and liabilities – all agency funds is presented for purposes of additional analysis and is not a required part of the basic financial statements.

The combining statement of changes in assets and liabilities – all agency funds is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining statement of changes in assets and liabilities – all agency funds is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated September 30, 2019, on our consideration of the South Carolina Department of Transportation's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Department's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Department's internal control over financial reporting and compliance.

SOUTH CAROLINA DEPARTMENT OF TRANSPORTATION

MANAGEMENT'S DISCUSSIONS AND ANALYSIS

As management of the South Carolina Department of Transportation (the "Department"), we provide this *Management's Discussion and Analysis* of the Department's financial statements for the fiscal year ended June 30, 2019 as a narrative overview and analysis. We encourage readers to consider this information in conjunction with the Department's financial statements, which follow.

Included in these financial statements is the discretely reported information of one component unit, The *Connector 2000 Association, Inc. (the Association)*, which operates the Southern Connector toll road in Greenville County under a license agreement with the Department. Component units are legally separate organizations for which the elected/appointed officials of the primary entity are financially accountable. The Department's inclusion of the Association as a component unit is done for the purpose of communicating information about its component unit as required by generally accepted accounting principles. It is not intended to create the perception that the Department has a legal or financial responsibility for the Association. The Association's financial statements are independently audited and a separate annual report with the auditor's opinion is dated April 25, 2019. We refer readers to that report and our financial statements for more detailed information.

FINANCIAL HIGHLIGHTS

Primary Entity

Net Position - The assets and deferred outflows of resources of the Department exceeded its liabilities and deferred inflows of resources at fiscal year ending June 30, 2019 by \$15.9 billion (presented as "Net Position"). Of this amount, a deficit of (\$276.2) million was reported as "unrestricted net position". Part of the deficit in unrestricted net position is due to the Department reporting \$748 million in pension and OPEB liabilities. The Department's component unit, Connector 2000 Association, Inc. reported a *net position deficit* of (\$81.8) million as of December 31, 2018, the close of its fiscal year.

Changes in Net Position - The Department's total net position increased by \$820.5 million, or 5.4% in fiscal year 2019. The increase in net position can be attributed to an increase in self-constructed infrastructure assets net of accumulated depreciation and a donation of infrastructure assets from the South Carolina Infrastructure Bank, as well as \$473.2 million in revenues from the Infrastructure Maintenance Trust Fund. The Department's component unit net position decreased by \$9.7 million.

Capital Assets - Capital Assets, net of depreciation, which include infrastructure, were approximately \$16 billion at June 30, 2019, for the Department. Capital additions for the year totaled \$882 million. The carrying value of capital assets removed from the records this year was \$7.4 million. Capital assets of the component unit, net of depreciation, were approximately \$117.7 million at December 31, 2018, which is comprised of equipment and the interest in a license agreement.

Long-term Obligations - The Department's total long-term obligations decreased by \$99.9 million (9%) during the current fiscal year to \$1,046.1 million. This change is attributable to a net decrease in bonds payable of \$52.8 million, a net decrease in the amount due the South Carolina State Transportation Infrastructure Bank of \$25.4 million and other net decrease of \$21.7 million. Long-term obligations of the component unit increased by 3.5% to \$212.7 million.

FUND ACTIVITY

Governmental Funds - Fund Balances - As of the close of fiscal year 2019, the Department's governmental funds reported a combined ending fund balance of \$990.1 million, an increase of \$120.4 million in comparison with the prior year. Of this total amount, \$479 million represents the "committed fund balance" which has been committed for spending at the Department's discretion on future road and bridge construction and maintenance or other necessary activities. Revenue exceeded expenditures by \$120 million. Overall agency expenditures were up 0.6% from the previous year.

In the current fiscal year, highway maintenance expenditures decreased 0.01% over the previous year while capital expenditures increased 7.3%. Operating expenditures, excluding debt service increased 4.7%, debt service decreased 1.6%, and allocations to other entities decreased \$27.1 million or 16%. Overall revenues decreased 5.2%. Federal revenues decreased 25.1% over last year; and motor fuel and fee revenues were up 5.7% from the previous year. Revenues from the Infrastructure Maintenance Trust Fund Fees were \$304.4 million.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the Department's basic financial statements. The Department's basic financial statements include three sections: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves. These sections are described below:

Government-Wide Financial Statements

The *Government-Wide Financial Statements* provide a broad overview of the Department's operations in a manner similar to a private-sector business. The statements provide both short-term and long-term information about the Department's financial position, which assists in assessing the Department's economic condition at the end of the fiscal year. These are prepared using the flow of economic resources measurement focus and the accrual basis of accounting. This basically means they follow methods that are similar to those used by most businesses. They take into account all revenues and expenses connected with the fiscal year even if cash involved has not been received or paid. The government-wide financial statements include two statements:

The *Statement of Net Position* presents all of the Department's assets, deferred outflows of resources, liabilities, and deferred inflows of resources with the difference between these reported as "net position". Over time, increases or decreases in the Department's net position may serve as a useful indicator of whether the financial position of the Department is improving or deteriorating.

The *Statement of Activities* presents information showing how the Department's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will not result in cash flows until future fiscal periods (such as unused vacation leave). This statement also presents a comparison between direct expenses and program revenues for each function of the Department.

Both of the above financial statements have separate columns for two different types of programs or activities. These two types of activities are:

Governmental Activities – The activities in this column are mostly supported by motor fuel taxes and intergovernmental revenues (federal grants). All services normally associated with the Department fall into this category.

Component Unit – The activities in this column are solely supported by the activities of the component unit. All services associated with the component unit fall into this category.

The government-wide financial statements can be found immediately following this discussion and analysis.

Fund Financial Statements

A fund is a grouping of related accounts that is used to maintain control over resources segregated for specific activities or objectives. The Department, like other state agencies, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the Department can be divided into two categories, governmental fund and fiduciary funds. The discretely presented component unit, Connector 2000 Association, Inc., is considered a proprietary fund. It is important to note that these fund categories use different accounting approaches and should be interpreted differently.

Governmental Funds – Most of the basic services provided by the Department are financed through the governmental funds. The governmental funds are used to account for essentially the same functions reported as governmental activities in the Government-wide financial statements. However, unlike the Government-wide financial statements, the governmental fund financial statements focus on near-term inflows and outflows of spendable resources. They also focus on the balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating the Department's near-term financing requirements. This approach is known as using the flow of current financial resources measurement focus and the modified accrual basis of accounting. These statements provide a detailed short-term view of the Department's finances that assists in determining whether there will be adequate financial resources available to meet the current needs of the Department.

Because the focus of the governmental funds is narrower than that of the Government-wide financial statements, it is useful to compare the information presented in governmental funds with similar information presented for governmental activities in the Government-wide financial statements. By doing so, readers may better understand the long-term impact of the Department's near-term financing decisions. Both the governmental funds balance sheet and the governmental funds statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and the Departmental activities. These reconciliations are presented on the page immediately following each governmental fund financial statement.

Special Revenue Funds – These funds are used to account for the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects and exclusive of resources held in trust for individuals, private organizations, or other governments.

The Department has two governmental funds which are special revenue funds which are described as follows:

Transportation Special Revenue Fund – The Transportation Special Revenue Fund, which is a special revenue fund, generally records the expenditure of revenues that are committed or restricted to specific programs or projects. This special revenue fund accounts for federal grant program revenues, taxes levied with statutorily defined distributions, and other resources committed or restricted as to purpose. Charges for and costs of operations of vehicles and other equipment utilized for road and bridge network projects are reported in this fund. The Transportation Special Revenue Fund was established pursuant to Section 57-11- 20 of the Code of Laws of South Carolina (the "Code").

This fund accounts for, among others, gasoline user fee, including the 2.66 cents per gallon that is allocated to the County Transportation Program Agency Fund; and, other special imposts upon highway users for the construction and maintenance of highways and bridges and for other operations of the Department. This fund also accounts for revenue from the sales of goods and services and from participation agreements between the Department and other entities for the sharing of costs of construction projects. The Department's appropriation from the State's General Fund is also included in this fund.

Infrastructure Maintenance Trust Special Revenue Fund – Established during fiscal year 2017, the Infrastructure Maintenance Trust Fund was created by South Carolina Act 40 of 2017 and provides additional funding to the Department to be used for the repairs, maintenance and improvements to the existing transportation system.

This fund accounts for a 2 cent increase to the existing gasoline user fee, an infrastructure maintenance fee imposed on the registration of vehicles, trailers, semi-trailers and other items pursuant to Chapter 3 of Title 56 of the Code, a motor carrier road use fee, an increase in biennial vehicle registration fees and a road use fee on hybrid and alternative fuel vehicles. The Infrastructure Maintenance Trust Fund is a special revenue fund as all funds are restricted by law to the repairs, maintenance and improvements of the existing transportation system.

The basic governmental fund financial statements can be found immediately following the government-wide statements.

Fiduciary Funds – These funds are used to account for resources held for the benefit of parties outside the Department. Fiduciary funds are not reflected in the Government-wide financial statements because the resources of these funds are not available to support the Department's own programs. Fiduciary funds financial statements use the accrual basis of accounting. The Department's fiduciary funds are the County Transportation Program Fund, the Right of Ways Fund, the Special Deposits Fund and the Local Tax Fund.

The basic fiduciary funds financial statements can be found immediately following the governmental fund financial statements.

Notes to the Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the Government-wide and the fund financial statements. The notes to the financial statements can be found immediately following the statement of fiduciary net position.

Required Supplementary Information and Combining Statement

The basic financial statements are preceded by the management discussion and analysis and are followed by another section of required supplementary information. This section includes a budgetary comparison schedule for the *governmental funds*, which includes comparisons of original budget to final budget to actual outflow (expenditures) on a non-GAAP budgetary basis. This section also includes financial disclosures of the Department's proportionate share of SCRS and PORS pension liabilities, actual contributions to these two retirement programs on behalf of current and former employees of the Department, retiree health benefit (OPEB) liabilities, and related contributions. Also included, but not required, is a combining statement of changes in assets and liabilities – agency funds.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

Net Position

As noted earlier, net position may serve over time as a useful indicator of a government's financial condition. The Department's assets (all classified as governmental activities) exceeded liabilities by \$15.9 billion at the close of business on June 30, 2019, (See **Table A-1** for a summary of net position for fiscal years 2017-2018 and 2018 - 2019). The largest portion of the Department's net position (98.6%) reflects its investment in infrastructure and other capital assets such as land, buildings, and equipment less any related debt used to acquire those assets that are still outstanding. The Department uses these capital assets to fulfill its primary mission to provide a safe and efficient transportation system for the State of South Carolina. Consequentially, these assets are not available for future spending. Although the Department's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

Table A-1
SCDOT Net Position

(In Millions)

	Governmental Activities	
	2019	2018
Current Assets	\$ 1,361.6	\$ 1,199.6
Non-Current Assets	1.8	15.4
Capital Assets	16,002.8	15,359.2
Other Assets and Deferred Outflows of Resources	78.0	93.5
Total Assets and Deferred Outflows of Resources	\$ 17,444.2	\$ 16,667.7
Current Liabilities	\$ 453.8	\$ 440.5
Non-current Liabilities	966.3	1,051.5
Deferred Inflows of Resources	60.0	32.1
Total Liabilities and Deferred Inflows of Resources	1,480.1	1,524.1
Net Position:		
Net Investments in Capital Assets	15,740.9	15,019.3
Restricted	499.4	334.3
Unrestricted	(276.2)	(209.9)
Total Net Position	\$ 15,964.1	\$ 15,143.6

At June 30, 2019, the Department's net position includes resources that are subject to external restrictions on how they may be used or represent amounts invested in capital assets. The remaining or unrestricted balance of net position is a deficit of (\$276.2) million primarily caused by the Department's pension and OPEB liabilities. Internally imposed designations of resources are not presented as restricted net position.

Changes in Net Position

The Department's net position increased by \$820.5 million, or 5.4%. The balance of the increase in net position can be attributed to an increase in self-constructed infrastructure assets net of accumulated depreciation. As stated earlier, the primary purpose of the Department is to maintain and preserve road infrastructure assets. Furthermore, the South Carolina Transportation Bank donated \$66.7 million in infrastructure assets to the Department.

In 2019, the Department's program expenses exceeded program revenues by \$420.6 million. A breakdown of the \$2.2 billion in gross revenues reveals that motor fuel user fees of \$729.8 million represented 33%, while Federal Highway, FEMA and transit allocations and grants of \$808.6 million represented 37%. Other revenue sources representing 30% of revenues came from various sources including toll revenues, motor vehicle fees, charges for services, state appropriations, and interest income. Increased miles driven resulted in a slight increase in the federal motor fuel revenues.

In September 2018, South Carolina was impacted by Hurricane Florence, which brought 10 to 18 inches of rain in areas saturating the ground and flooding the rivers. The Department actively responded to the widespread flooding across the Northeast portion of the state which caused over 200 road and bridge closures and damaged roadways. The Department conducted thorough inspections of all impacted roads and bridges and began recovery of the State Highway System. The Department has incurred costs through June 30, 2019 of \$32.8 million of which \$10.2 million has been received in federal assistance. Additional federal assistance based upon eligibility is expected to be approximately \$8.6 million as well as \$2.3 million of state funds approved by the General Assembly for Federal Emergency Management matching funds.

During September 2017, South Carolina experienced inclement weather as Hurricane Irma impacted the southern United States. This event caused wind, surge damage and flooding to the coast. The Department has incurred costs through June 30, 2019, of \$4.9 million of which \$1.1 million has been received in federal assistance and \$383 thousand in state funds approved by the General Assembly for Federal Emergency Management matching funds. Additional federal assistance based upon eligibility is expected to be approximately \$516 thousand along with \$172 thousand of state funds.

In October 2016, Hurricane Matthew made landfall in McClellanville, SC as a Category 1 storm with sustained winds of 75 miles per hour. This event caused wind and surge damage to the lower part of the coast and wind and flooding damage to the northern part of the coast. The Department conducted thorough inspections of all bridges and roads and began recovery of the State Highway System. The Department has incurred costs through June 30, 2019 of \$74.9 million of which \$51.3 million has been received in Federal assistance and \$8.8 received from funds approved by the General Assembly for Federal Emergency Management matching funds. Additional federal assistance based upon eligibility is expected to be approximately \$6 million along with \$1 million state funds approved by the General Assembly for Federal Emergency Management matching funds.

South Carolina experienced a statewide emergency event of significant rainfall resulting in widespread flooding in October 2015. Total damages on the State Highway System were estimated to be \$137 million and many costs are eligible for federal assistance from Federal Highway Administration and Federal Emergency Management. During the 2016 Legislative Session, The General Assembly provided funding in the amount of \$49 million which was to assist the Department in the recovery and repair process and provide required federal assistance matching funds. Through June 30, 2019, the Department has incurred costs of \$123.3 million of which \$80.6 million has been received in federal assistance. Additional federal assistance of \$12 million is expected and will be based upon total costs and their federal assistance eligibility.

On December 4, 2015, President Obama signed into law Public Law 114-94, the Fixing America's Surface Transportation Act (FAST Act). The FAST Act funds surface transportation programs—including, but not limited to, Federal-aid highways—at over \$305 billion for fiscal years 2016 through 2020. SC was apportioned \$723.2 million in Federal Fiscal Year 2019. It is the first long-term surface transportation authorization enacted in a decade that provides long-term funding certainty for surface transportation.

Table A-2 presents a breakdown of these revenues and expenses for fiscal year 2018-2019 with comparative figures for the prior year.

Table A-2

Changes in Net Position	<u>\$ 820.5</u>		<u>\$ 933.2</u>	

FINANCIAL ANALYSIS OF THE DEPARTMENT'S INDIVIDUAL FUNDS

As noted earlier, the Department uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental Funds

The focus of the Department's governmental funds are to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the Department's financing requirements. In particular, fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year. As of the end of the current fiscal year, the Department's Transportation Special Revenue Fund reported ending fund balance of \$492 million, a decrease of \$53.4 million in comparison with the prior year. "Committed" fund balance is 97.4% of the total fund balance or \$479 million, which has been approved by the Board of Commissioners for spending in the coming years. The remainder of fund balance is "non-spendable" for (1) for inventories and prepaid expenses (\$11.1 million), (2) for long-term receivables (\$0.4 million) and \$203 thousand for other assets.

The Department's Infrastructure Maintenance Trust Special Revenue Fund reported ending fund balance of \$498.2 million, an increase of \$174 million from prior year. "Restricted" fund balance is 100% of the total fund balance or \$498.2 million, as it has already been restricted by law to fund maintenance expenditures of existing roadways.

GOVERNMENTAL FUND BUDGETARY HIGHLIGHTS

The South Carolina Appropriations Act as enacted becomes the legal operating budget for the Department. The Department's legally adopted budget is presented at the program level including the restricted, earmarked, and general funds appropriated and is included in Other Budgeted Funds for the State. Legal level of authority exists at the program level and any revisions to the budget over and above the amount totally appropriated must be approved by the State Fiscal Accountability Authority. The Department has the authority to carry forward any unspent cash balances in certain earmarked accounts and appropriate those balances to meet program expenditures.

Program expenditures for permanent improvements and maintenance that are federally funded were lower than planned due to the delayed execution of projects and weather-related delays. As a result, federal reimbursements were lower than budgeted.

CAPITAL ASSETS AND DEBT ADMINISTRATION

Capital Assets

The Department's investment in capital assets for its governmental activities as of June 30, 2019, amounts to \$20.5 billion, less accumulated depreciation of \$4.5 billion, leaving a net book value of \$16 billion. This investment in capital assets includes land, buildings, improvements, equipment, infrastructure and construction in progress. Infrastructure assets are items that are normally stationary in nature and can be preserved for a significantly longer period than most capital assets. In the case of the Department, infrastructure assets are classified into **three networks: roads, bridges and right of ways**. Costs or estimated costs of infrastructure and related depreciation were recorded retroactively back to the year 1917. The Department has chosen to depreciate infrastructure assets (excluding right of ways). **Table A-3** summarizes capital assets at June 30, 2018 and June 30, 2019.

Table A-3
SCDOT Capital Assets
(In Millions)

	Primary Government	
	2019	2018

Right of Way	1,702.3	1,665.5
Roads	15,219.5	14,526.0
Construction in Progress	3,221.2	3,119.4
Total Cost	\$ 20,543.3	\$ 19,683.6
Less Accumulated Depreciation	4,540.5	4,324.4
Net Capital Assets	\$ 16,002.8	\$ 15,359.2

The total increase in the Department's investment in capital assets for the current fiscal year was about 4.2% in terms of net book value. However, actual expenditures to purchase or construct capital assets were \$815 million for the year. Donated assets equaled \$66.7 million. Depreciation charges for the year totaled \$231.3 million. There was a total of \$7.4 million in capital assets disposed of during the year. Refer to note 6 in the financial statements for additional information on capital assets.

Long Term Debt and Other Long Term Obligations

The authority of the Department to incur debt is described in Sections 57-11-210 of the South Carolina Code and continued and amended by Section 11-27-30 thereof, authorizing the issuance of general obligation State Highway Bonds for highway construction and related purposes backed by the full faith and credit of the state. State Highway Bonds are additionally secured by a pledge of so much of the revenues as may be made applicable by the General Assembly for state highway purposes from gasoline and fuel oil taxes and motor vehicle license fees.

The Department's total long-term obligations decreased by \$99.9 million during the current fiscal year to \$1,046.1 million. The net decrease is primarily attributed to the payment of principal on outstanding debt of \$72 million. Other long-term debt includes \$152.1 million due to the South Carolina State Transportation Infrastructure Bank for financial assistance on transportation projects managed by the entity and accrued compensated absences of \$31.7 million (net increase for the year of \$4.8 million). Due within one year for all long-term obligations is \$79.8 million. Refer to notes 7, 8 and 9 of the financial statements for additional information on debt administration.

The Department's net pension liability has been recorded in accordance with GASB Statement No. 68 and represents the Department's share of the State's net pension liability. The net pension liability as of June 30, 2018 was \$449.1 million and at June 30, 2019, it had decreased to \$423.6 million. The decrease is due to an overall decrease in the net pension liability in the pension plan of the State. GASB Statement No. 68 does not affect the Department's required contributions to the pension plan. See Note 12 to the financial statements for additional information regarding the Department's pension plan.

The Department was required to record its proportionate share of the net OPEB liability in accordance with GASB Statement No. 75 and represents the Department's share of the State's net OPEB liability related to the State's Retiree Health Insurance Trust Fund. The net OPEB liability as of June 30, 2019 was \$324.5 million.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES

During the 2017 Legislative Session Act 40, the "Roads Bill", was adopted which provides the Department with the first sustainable and significant increase in revenue in 30 years. The motor fuel user fees will increase by 2 cents a year, beginning July 2017, and continue to increase by 2 cents per year for the next 6 years for a total of 12 cents by July 2022. In addition to motor fuel user fees, Act 40 increased a variety of motor vehicle fees, the maximum sales and use tax and created an infrastructure maintenance fee. During FY19-20, the Department budgeted to receive an additional \$413 million in Act 40 revenues. The new revenues are to be largely allocated specifically to the long-term maintenance and preservation of the State system. Over the next ten years, with the assistance of these funds, the Department will improve the "worst of the worst" dangerous rural roads, replace approximately half of the Department's structurally deficient bridges, resurface or rebuild fifty percent of the State's highways and embark on Interstate widening projects. At full implementation, the 2017 Roads Bill will add an estimated additional \$600 million for South Carolina infrastructure.

The Department is at its highest level of activity over the past decade, and has tripled the number of projects under construction with over \$3 billion "on the streets" in construction work.

On July 1, 2017, the Department embarked on a new Strategic Plan which includes the following five goals; improve safety programs and outcomes in high-risk areas, maintain and preserve the existing transportation structure, improve the Department's program delivery and increase the efficiency and reliability of the South Carolina road and bridge network, provide a safe and productive work environment for Department employees and earn public trust through transparency, improved communication and audit compliance. Accomplishments in the second year: a 6% reduction in road fatalities, 66 miles of rural road safety projects recommended for award, approximately 86% of the 43,555 routine maintenance customer requests resolved within 30 days, 16% reduction in the number of mass transit vehicles in poor condition, 55% reduction in workplace injuries and simplification of the Department website to create a more user-friendly interface for the public and industry partners.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the Department's finances for all of the Department's taxpayers, customers, investors and creditors. This financial report seeks to demonstrate the Department's accountability for the money it receives.

Questions concerning any of the information provided in this report or requests for additional information should be addressed to:

South Carolina Department of Transportation
Deputy Secretary of Finance and Administration
955 Park Street, Suite 304
Columbia, South Carolina 29202-0191

The Department's component unit, Connector 2000 Association, Inc., issues its own separately audited financial statements. These statements may be obtained by directly contacting Southern Connector at Post Office Box 408, Piedmont, South Carolina 29673 or by telephone at (864) 527-2150.

SOUTH CAROLINA DEPARTMENT OF TRANSPORTATION

NOTES TO THE FINANCIAL STATEMENTS

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Reporting Entity

The South Carolina Department of Transportation (the "Department") was established pursuant to Section 57-1-20 of the Code of Laws of South Carolina (the "State") as an administrative agency of the State, comprised of a Division of Intermodal Planning; a Division of Engineering; and a Division of Finance and Administration. The Department is responsible for the planning, construction, maintenance and operation of the highway system of the State and the coordination of statewide mass transit activities.

The Department is governed by the South Carolina Transportation Commission (the "Commission"), which is composed of nine members: one member from each Congressional District and two at-large members. The District members are appointed by the Governor, subject to approval of the legislative delegations of their respective Districts. The at-large members are appointed by the Governor, subject to approval by a separate confirmation vote in both the Senate and the House of Representatives.

The Commission serves as a general policy-making body for the various functions and purposes of the Department as prescribed by law. The Commission defines policies that are to be administered by the Secretary of Transportation.

The core of a financial reporting entity is normally the primary government, which has a separately elected governing body. The Department is reported as part of the primary government of the State. An organization other than a primary government may serve as a nucleus for a reporting entity when it issues separate financial statements. The Department is identified herein as such a primary entity. As required by generally accepted accounting principles, the financial reporting entity includes both the primary entity and all of its component units. Component units are legally separate organizations for which the elected officials of the primary entity are financially accountable, or entities that if excluded would make the financial statements misleading or incomplete. In turn, component units may have component units. The Department has determined it has one component unit, the Connector 2000 Association, Inc. (the "Association"). The Association is reported as of December 31 year-end. The Association's disclosures are included in Note 19.

A primary government or entity is financially accountable if it appoints a voting majority of the organization's governing body, and (1) it is able to impose its will on that organization or (2) there is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the primary entity. The primary entity also may be financially accountable if an organization is fiscally dependent and there is a potential for the organization to provide a financial benefit or impose a financial burden on the primary entity, even if it does not appoint a voting majority of the board. An organization is fiscally dependent on the primary entity that holds one or more of the following powers:

- 1) Determines its budget without another government having the authority to approve and modify that budget;
- 2) Levies taxes or set rates or charges without approval by another government; or,
- 3) Issues bonded debt without approval by another government.

Based on the above described financial accountability criterion, the Department has determined it is not a component unit of another entity and the Association is a component unit of the Department under Statements 14, 39 and 61 of the Governmental Accounting Standards Board ("GASB"). The Association is a component unit due to the nature and significance of the relationship between the Association and the Department. This financial reporting entity includes only the Department (a primary entity) and its component unit.

Government-Wide and Fund Financial Statements

The financial statements of the Department and its component unit are presented in accordance with accounting principles generally accepted in the United States of America applicable to state and local governmental units. The GASB is the accepted standard-setting body in the United States of America for establishing governmental accounting and financial reporting principles.

Government-Wide Financial Statements

The Government-wide financial statements are prepared on the accrual basis of accounting and include a "Statement of Net Position" which discloses the financial position of the Department; and a "Statement of Activities" which demonstrates the degree to which the direct expenses by function of the Department's programs are offset by program revenues.

Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) Charges to customers or applicants who purchase, use or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Other items not properly included among program revenues are reported instead as general revenues.

The Government-wide financial statements (i.e., the Statement of Net Position and the Statement of Activities) report information on all of the non-fiduciary activities of the primary government.

Fund Financial Statements

The Department uses funds to report its financial position and results of operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain government functions or activities.

Governmental Funds:

Governmental funds are those through which most governmental functions typically are financed and are used to account for all or most of a government's general activities, including the collection and disbursement of earmarked monies. Expendable assets are assigned to the various governmental funds according to the purposes for which they may or must be used; current liabilities are assigned to the fund from which they are to be paid; and, the difference between the assets and liabilities is fund balance.

Transportation Special Revenue Fund – The Transportation Special Revenue Fund, which is a special revenue fund, generally records the expenditure of revenues that are committed or restricted to specific programs or projects. This special revenue fund accounts for federal grant program revenues, taxes levied with statutorily defined distributions, and other resources committed or restricted as to purpose. Charges for and costs of operations of vehicles and other equipment utilized for road and bridge network projects are reported in this fund. The State Transportation Special Revenue Fund was established pursuant to Section 57-11- 20 of the Code of Laws of South Carolina (the "Code").

This fund accounts for, among others, gasoline user fee, including the 2.66 cents per gallon that is allocated, by state statute, to the County Transportation Program Agency Fund; and, other special imposts upon highway users for the construction and maintenance of highways and bridges and for other operations of the Department. This fund also accounts for revenue from the sales of goods and services and from participation agreements between the Department and other entities for the sharing of costs of construction projects. The Department's appropriation from the State's General Fund is also included in this fund.

Infrastructure Maintenance Trust Special Revenue Fund – The Infrastructure Maintenance Trust Fund was created by South Carolina Act 40 of 2017 and provides additional funding to the Department to be used for the repairs, maintenance and improvements to the existing transportation system.

This fund accounts for a 2 cents increase to the existing gasoline user fee per year for six years, an infrastructure maintenance fee imposed on the registration of vehicles, trailers, semi-trailers and other items pursuant to Chapter 3 of Title 56 of the Code, a motor carrier road use fee, an increase in biennial vehicle registration fees and a road use fee on hybrid and alternative fuel vehicles. The Infrastructure Maintenance Trust Fund is a special revenue fund as all funds are restricted by law to the repairs, maintenance and improvements of the existing transportation system. The fund may collect additional fees for a ten-year period starting in the year ended June 30, 2017.

Fiduciary Funds:

Fiduciary funds are used to account for assets held by the Department in a trustee capacity or as an agent for individuals, private organizations, other governmental units and/or other funds. The Department uses agency funds which are purely custodial (assets equal liabilities) and thus do not involve the measurement of results of operations. The agency funds used by the Department include the following:

- The County Transportation Program Fund was established pursuant to Section 12-28-2740 of the Code to provide for the receipts from distribution and use of the of the 2.66 cents per gallon gasoline user fee collected by the South Carolina Department of Revenue and remitted to the Department County Transportation Program. Beginning July 1, 2018, the County Transportation Program's portion increases by .3325 cents per gallon through July 1, 2021, when the total amount will equal 3.39 cents per gallon. In addition to the motor fuel user fee, the Department is required to transfer up to \$20.5 million annually from the Infrastructure Maintenance Trust Fund to the County Transportation Program (the "Program"). Each county has a transportation committee that is appointed by the county legislative delegation to administer the use of these funds. Based on the legally prescribed allocation formula, these monies are either paid directly to the counties for infrastructure projects that are administered by the counties or to vendors on behalf of the counties for expenditures incurred on projects that the county transportation committees have contracted the Department to administer.
- The Right of Way Fund is used to account for payments for the purchase of right of ways land which has been contested by the property owner. In those cases, the property owner is paid 75% of the offer and 25% of the offer is transferred to the county clerk of court. Current year's activity represents receipt of funds from various clerks of court and disbursement to property owners upon settlement of contested cases.
- The Special Deposits Fund is used to account for various funds that are collected from other governments or agencies and outside parties. These funds are held until resolution of various matters, such as anti-trust violations, oversize and overweight charges and other similar items that occur.

Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned or for non-exchange transactions, when all eligibility requirements have been met, and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. "Measurable" means that the amount of the transaction can be determined and "available" means collectible within the current period or soon enough thereafter to pay obligations of the current period. For this purpose, the Department considers major sources of revenues to be available if they are collected within sixty days of the end of the current fiscal year. Major sources of revenue reported in compliance with policy are taxes and fees, federal grants, and participation agreements. The Department also accrues current amounts due on long-term receivables based on set repayment schedules.

Expenditures generally are recorded when a liability is incurred, except for principal and interest on bonds payable and other long-term obligations, as under accrual accounting. Financial resources of fiduciary funds are reported using the economic resources measurement focus and the accrual basis of accounting.

Revenues – Exchange and Non-Exchange Transactions

Revenues resulting from exchange transactions, in which each party gives and receives essentially equal value, are recorded on the accrual basis when the exchange takes place and the transaction revenues are recorded in the fiscal year in which the resources are measurable and become available on the modified accrual basis.

Non-exchange transactions, in which the Department receives value without directly giving value in return, include grants and donations. On an accrual basis, revenue from grants and donations are recognized in the fiscal year in which all eligibility requirements have been satisfied. Eligibility requirements include timing requirements, which specify the year when the resources are required to be used or the fiscal year when use is first permitted or authorized; matching requirements, in which the Department must provide local resources to be used for a specific purpose; and expenditure requirements, in which the resources are provided to the Department on a reimbursement basis contingent upon the federal authority to claim the funds.

Budget Policy

All activity in the Department's governmental funds is budgeted, and inclusive of State General Funds and Other Funds. The State General Assembly enacts the annual appropriation which becomes the Transportation Special Revenue Fund and Infrastructure Maintenance Trust Special Revenue Fund operating budget. Please refer to the information contained in Required Supplementary Information for the budgeted and actual expenditures on the budgetary basis of accounting and related notes on pages 70-72

Cash and Cash Equivalents

The amounts shown in the financial statements of the Department as "cash and cash equivalents" represent petty cash, cash on hand with the State Treasurer, and cash invested in various instruments by the State Treasurer as part of the State's internal cash management pool.

Most State agencies, including the Department, participate in the State's internal cash management pool. Because the cash management pool operates as a demand deposit account, amounts invested in the pool are classified as cash and cash equivalents. The State Treasurer administers the cash management pool. The pool includes some long-term investments, such as obligations of the United States and certain agencies of the United States, obligations of the State of South Carolina and certain of its political subdivisions, certificates of deposit, collateralized repurchase agreements, and certain corporate bonds. Information pertaining to carrying amounts, fair value, and credit risk of the State Treasurer's investments is disclosed in the Comprehensive Annual Financial Report ("CAFR") of the State of South Carolina.

The State's internal cash management pool consists of a general deposit account and several special deposit accounts. The State records each fund's equity interest in the general deposit account; however, all earnings on that account are credited to the General Fund of the State. The Department records and reports its deposits in the general deposit account at cost, and records and reports its deposits in the special deposit accounts at fair value. Investments held by the pool are recorded at fair value. Interest earned by the Department's special deposit accounts is posted to the Department's account at the end of each month and is retained. Interest/investment earnings are allocated based on the percentage of the Department's accumulated daily income receivable to the income receivable of the pool. Reported income includes interest earnings at the stated rate, realized gains/losses and unrealized gains/losses arising from changes in the fair value of investments in the pool. Realized gains and losses are allocated daily and are included in the accumulated income receivable. Unrealized gains and losses are allocated at year-end based on the percentage ownership in the pool.

Some State Treasurer accounts are not included in the State's internal cash management pool because of restrictions on the use of the funds. For those accounts, cash equivalents include investments in short-term highly liquid securities having an initial maturity of three months or less at the time of acquisition. At year-end, the Department held no investments.

Capital Assets

Capitalized assets include land, improvements to land, easements, right-of-ways, buildings, building improvements, vehicles, equipment, furniture, infrastructure, and all other tangible or intangible assets that are used in operations and have initial useful lives extending beyond a single reporting period. Infrastructure assets acquired prior to fiscal years ended June 30, 1980 are reported at cost beginning with fiscal year 1917. Capital assets also include assets purchased with Federal funds in which the Federal government retains a reversionary interest.

Capital assets are recorded at cost at the date of acquisition or acquisition value at the date of donation in the case of gift. Assets contributed by another state agency are recorded at the carrying value of that agency. The Department follows capitalization guidelines established by the State. Major additions, renovations, and other improvements which provide new uses, or extend the useful life of an existing capital asset, are capitalized. Routine repairs and maintenance are charged to operations in the year in which the expense is incurred.

Depreciation is computed using a full month of depreciation recorded upon the initial acquisition of the asset. A full month of depreciation will be recorded during the life of the asset each month and this will continue until retirement of the asset or until full depreciation of that asset has occurred.

A summary of the Department's capitalization thresholds and useful life by asset category is as follows:

<u>Asset Category</u>	<u>Capitalization</u>	<u>Useful Life (Years)</u>
Land	All, regardless of cost	Indefinite
Non-depreciable land improvements	All, regardless of cost	Indefinite
Depreciable land improvements	Any costing more than \$100,000	30
Infrastructure: Roads	Any costing more than \$500,000	75
Bridges		50
Buildings and building improvements	Any costing more than \$100,000	30
Vehicles Equipment and furniture	Any costing more than \$5,000	5 – 12

Receivables

Receivables are reported net of any allowances for uncollectible amounts and any discounts, if applicable. The Department's receivables consist of amounts due from the Federal government, State agencies, local governments, and other entities and individuals. Some of the receivables are evidenced by notes and contracts. The notes and contracts are related to costs shared by other entities in construction projects.

Prepaid Expenses

The Department makes certain payments to vendors to reflect costs applicable to future accounting periods and are recorded as prepaid expenses in the accompanying financial statements.

Inventories

The Department maintains inventories for its use and resale to other state agencies, local governments, and other entities. All inventories are valued at cost using the weighted average method. Expenditures for inventory are accounted for using the consumption method of accounting.

Other Assets

Other assets consist of right of way land the Department had to purchase for economic reasons that was not allocable to project construction costs. These purchases are held until they are disposed of and are reflected in the accompanying financial statements at the original cost to the Department. Expenditures for this land are accounted for using the consumption method of accounting in which the purchase is recorded as expenditure when purchased. Gains or losses on the disposition of right of way land are included in the other revenues category in the fund financial statements. Right of way land transferred to county and municipal governments for no consideration are recorded as allocations to other entities – county and municipal governments in the fund financial statements.

Bonds Payable, Bond Discounts, Bond Premiums and Bond Issuance Costs

The Department reports bonds payable in the government-wide financial statements. The Department defers and amortizes bond discounts and bond premiums over the term of the bonds using the bonds outstanding method, which results in amortization being computed using the percentage of bonds retired to the original amount of bonds issued. Costs incurred in connection with the bond issues are expensed as incurred unless it is insurance. The Department reports bonds payable net of the applicable bond premium or discount.

Deferred Outflows and Inflows of Resources

Deferred outflows of resources consist of deferred losses on refunding of bonds and amounts related to the net pension and other post-employment benefits (“OPEB”) liabilities. The deferred losses on refunding of bonds result from the current or advance refunding of bonds resulting in the defeasance of debt. The difference between the reacquisition price and the net carrying amount of the old debt is amortized over the remaining life of the old debt or the life of the new debt, whichever is shorter.

Refer to Notes 10, 12, and 13 for information on Department's deferred outflows and inflows of resources.

Rebatable Arbitrage

Arbitrage involves the investment of proceeds from the sale of tax-exempt securities in a taxable investment that yields a higher rate, resulting in income in excess of interest costs. Federal law requires entities to rebate to the government such income on tax-exempt debt if the yield from those earnings exceeds the effective yield on the related tax-exempt debt issued. Governmental units may avoid the requirement to rebate the “excess” earnings to the federal government under certain circumstances, if they issue no more than \$5 million in total of all such debt in a calendar year and if they meet specified targets for expending of the proceeds and interest earnings thereon. For this purpose, tax-exempt indebtedness includes bonds and certain capital leases and installment purchases. The federal government only requires arbitrage be calculated, reported and paid every five years or at maturity of the debt, whichever is earlier.

The potential liability is calculated annually for financial reporting purposes. There was no arbitrage liability at June 30, 2019.

Unearned Revenue

Unearned revenue in the government-wide financial statements consists of advance payments received for construction projects which have not been earned. Revenues are recognized in the period in which the project expenditures are made. Revenues from participation agreements and other project contracts are recognized as earned based on the percentage of completion method. The unearned portion is reflected as unearned revenue in the liability section of the financial statements of the Department until earned.

Unearned revenue in the fund financial statements represents the long-term portion of receivables that will not be collected within one year of the balance sheet date and advance payments for construction projects.

Compensated Absences

Generally, all permanent, full-time State employees and certain part-time employees scheduled to work at least one-half of the agency's work days of the month are entitled to accrue and carry forward at calendar year-end maximums of 180 days sick leave and of 45 days annual vacation leave. Upon termination of State employment, employees are entitled to be paid for accumulated unused annual vacation leave up to the maximum, but are not entitled to any payment for unused sick leave. The compensated absences liability includes accrued annual leave earned for which the employees are entitled to paid time off or payment at termination. The Department calculates the gross compensated absences liability based on recorded balances of unused leave. The entire unpaid liability for which the employer expects to compensate employees through paid time off or cash payments, inventoried at fiscal year-end current salary costs and the cost of the salary-related benefit payments, is recorded as a liability.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect certain reported amounts of assets, deferred outflows of resources, liabilities and deferred inflows of resources, and disclosure of contingent assets and liabilities at the date of the basic financial statements and the reported amounts of revenues and expenses/expenditures during the reporting period. Accordingly, actual results could differ from those estimates. Estimates include but are not limited to the amounts remaining on outstanding construction contracts, the allowance for doubtful accounts and the useful life of capital assets and estimates of the pension and OPEB liabilities.

Net Position

The Department presents the following classifications of net position in the "Statement of Net Position" in accordance with GASB 63, *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position*.

Net Investment in Capital Assets – Consists of capital assets, including restricted capital assets, net of accumulated depreciation and amortization, and reduced by the outstanding balances of any bonds, notes or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.

Restricted net position – Consists of assets with constraints placed on the use either by (1) external groups such as creditors, grantors, contributors, or laws or regulations of other governments; or (2) law through constitutional provisions or enabling legislation. In all cases, if individual restricted net position categories are negative, the negative balance is eliminated and reclassified against unrestricted net position. \$498.2 million of net position is restricted by enabling legislation related to the Infrastructure Maintenance Trust Fund.

Unrestricted net position – All other assets that do not meet the definition of "restricted" or "net investment in capital assets".

The Department's policy is to first apply restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net position is available.

Fund Balance

The following categories of fund balance are being used in the fund level financial statement of the governmental fund in accordance with GASB Statement 54, *Fund Balance Reporting and Governmental Fund Type Definitions*:

Nonspendable fund balance

The nonspendable fund balance classification includes amounts that cannot be spent because they are either not in spendable form or legally or contractually required to be maintained intact. The “not in spendable form” criterion includes items that are not expected to be converted to cash, for example, inventories and prepaid amounts.

Restricted fund balance

The restricted fund balance classification includes amounts that are either restricted externally by creditors, grantors, contributors, or laws or regulations of other governments or restricted by law through constitutional provisions or enabling legislation. The use of the Infrastructure Maintenance Trust Special Revenue Fund is restricted by law and as such, its fund balance is presented as restricted.

Committed fund balance

The committed fund balance classification includes amounts that can only be used for specific purposes pursuant to constraints imposed by formal action of the Department’s highest level of decision-making authority. Those committed amounts cannot be used for any other purpose unless the Department removes or changes the specified use by taking the same type of action it employed to previously commit those amounts. Committed fund balances also incorporate contractual obligations to the extent that existing resources in the fund have been specifically committed for use in satisfying those contractual requirements. The Department recognizes committed fund balances that have been approved for specific purposes by Department Commission before the fiscal year end.

The Department pre-defines the use of committed fund balance with two key actions. 1) The Commission submits a budget to the governor, the budget, in some revised form, is later approved by the legislature and governor, which generally governs the purpose and use of departmental funds and resources. 2) The Commission also develops and approves, following public comment, the Statewide Transportation Improvement Plan (“STIP”) which further prioritizes the use of Departmental funds and resources for the following six years. Amendments to either the annual budget or the STIP require formal submission to the State Budget Office or to the Commission respectively.

Assigned fund balance

The assigned fund balance classification includes amounts that are constrained by the Department’s intent to be used for specific purposes but are not restricted or committed. The authority for making an assignment is not required to be the Department’s highest level of decision-making authority and as such, the nature of the actions necessary to remove or modify an assignment does not require the Department’s highest level of authority. Assigned fund balance amounts in the Department’s financial statements represent amounts approved by the Department to be transferred and spent after year end. In the special revenue fund, assigned fund balances represent amounts to be spent for specific purposes. The Department had no assigned fund balance at June 30, 2019 as it was all restricted or committed.

Unassigned fund balance

The unassigned fund balance classification includes amounts that have not been assigned to other funds and has not been restricted, committed, or assigned for specific purposes within the general fund. The governmental fund is presented as a special revenue fund, and therefore, there was no unassigned fund balance.

Based on the Department’s policies regarding fund balance classifications as noted above, the Department considers amounts that are restricted, committed, or assigned to be spent when the corresponding expenditure that has been designated by the Department’s Commission has been made.

NOTE 2. DEPOSITS AND INVESTMENTS:

The following schedule reconciles deposits and investments within the footnotes to the amounts in the financial statements:

Deposits Held by State Treasurer

The deposits of the Department held by the State Treasurer are under the control of the State Treasurer who, by law, has sole authority for investing State funds. State law requires full collateralization of all State Treasurer bank balances. The State Treasurer must correct any deficiencies in collateral within seven days.

With respect to investments in the State's internal cash management pool, all of the State Treasurer's investments are insured or registered or are investments for which the securities are held by the State or its agent in the State's name. The State's investment policy by law authorizes investments that vary by fund, but generally include obligations of the United States and certain agencies of the United States, obligations of the State of South Carolina and certain of its political subdivisions, certificates of deposit, collateralized repurchase agreements, certain corporate bonds, and commercial paper.

Custodial credit risk for investments is the risk that in the event of a failure of the counterparty to a transaction, the State will not be able to recover the value of investments or collateral securities that are in possession of an outside party. All of the State Treasurer's investments are fully insured or collateralized.

More information pertaining to carrying amounts, fair value, credit and other risks as required by GASB Statement No. 40, *Deposits and Investments - Risk Disclosures*, and GASB Statement No. 72, *Fair Value Measurement and Application* of the State Treasurer's investments are disclosed in the CAFR of the State of South Carolina.

	(In Thousands)	
	Financial Statements	Footnotes
Primary Entity:		
Unrestricted current assets:		
Cash and cash equivalents	\$ 982,692	Deposits held by State Treasurer \$ 1,180,882
Restricted noncurrent assets:		
Cash and cash equivalents	1,218	-
Fiduciary - Agency Funds		
Cash and cash equivalents	196,972	-
Total Primary Entity	<u>\$ 1,180,882</u>	<u>\$ 1,180,882</u>

Cash and cash equivalents reported include an unrealized gain of \$14 million for the governmental funds and an unrealized gain of \$3.0 million for the fiduciary funds as of June 30, 2019, arising from changes in the fair value. Interest/investment income includes an unrealized gain of \$21.2 million for the year ended June 30, 2019, for the Department's governmental funds.

NOTE 3. STATE APPROPRIATIONS:

The original appropriation is the Department's base budget amount as presented in Section 84, Part IA of the 2018-2019 Appropriation Act. The Department received \$2.408 billion in appropriations. The Department received \$57.3 thousand in recurring state general funds. The Department carried forward \$16.767 million in state appropriations from fiscal year 2018 to 2019. In fiscal year 2019, the Department expended \$1.872 billion on the budgetary basis of accounting and \$2.023 billion was expended under the modified accrual basis of accounting.

NOTE 4. RECEIVABLES:**PRIMARY ENTITY:**

The following schedule summarizes receivables at June 30, 2019, which include various notes, contracts and other accounts receivable.

(In Thousands)			
<u>Due From / Description</u>	<u>Current Portion</u>	<u>Long-term Portion</u>	<u>Totals</u>
<u>Intergovernmental:</u>			
Federal Government:			
Amounts due under various grant programs and reimbursable contracts	\$ 116,114	\$ -	\$ 116,114
	<u>116,114</u>	<u>-</u>	<u>116,114</u>
<u>State Agencies:</u>			
South Carolina Department of Motor Vehicles			
License Fees	100,580	-	100,580
South Carolina Department of Revenue			
Gasoline and special fuels fees	119,174	-	119,174
Various Agencies:			
Sales of goods and services	3,494	-	3,494
	<u>223,248</u>	<u>-</u>	<u>223,248</u>
<u>Local Governments:</u>			
Long-term contracts for construction projects	549	253	802
Participation agreements	2,154	-	2,154
	<u>2,703</u>	<u>253</u>	<u>2,956</u>
<u>Other:</u>			
Long-term contracts for construction projects	24	106	130
Sales of goods and services	1,350	-	1,350
Less: allowance for doubtful accounts	(337)	-	(337)
	<u>1,037</u>	<u>106</u>	<u>1,143</u>
Total Receivables	<u>\$ 343,102</u>	<u>\$ 359</u>	<u>\$ 343,461</u>

The balances due under long-term contracts for construction projects from local governments and other entities represent loans to those entities for their share of the costs of construction projects.

NOTE 5: INVENTORIES:

The following schedule summarizes inventories at June 30, 2019:

(In Thousands)	
Sign Shops	\$ 769
Repair Shops	2,989
Supply Depot	1,669
	<u>\$ 5,427</u>

NOTE 6. CAPITAL ASSETS:**PRIMARY ENTITY:**

The following schedule summarizes changes in the Department's capital assets and their funding sources for the year ended June 30, 2019:

(In Thousands)					
	Beginning Balances June 30, 2018	Increases	Decreases	Transfers	Ending Balances June 30, 2019
Capital assets not being depreciated:					
Land and improvements	\$ 3,371	\$ -	\$ -	\$ 1,324	\$ 4,695
Right of ways land	1,665,479	38,095	(1,270)	-	1,702,304
Construction in progress:

Vehicles	122,780	10,997	(2,930)	-	130,847
Total other capital assets	<u>14,895,411</u>	<u>24,978</u>	<u>(21,196)</u>	<u>715,982</u>	<u>15,615,175</u>
Less accumulated depreciation for:					
Infrastructure - road and bridge network	4,061,650	209,850	(7,974)	-	4,263,526
Buildings and improvements	51,230	2,266	-	-	53,496
Equipment and furniture	100,524	9,300	(4,219)	-	105,605
Vehicles	110,974	9,858	(2,914)	-	117,918
Total accumulated depreciation	<u>4,324,378</u>	<u>231,274</u>	<u>(15,107)</u>	<u>-</u>	<u>4,540,545</u>
Other capital assets, net	<u>10,571,033</u>	<u>(206,296)</u>	<u>(6,089)</u>	<u>715,982</u>	<u>11,074,630</u>
Total capital assets for governmental activities, net	<u>\$ 15,359,240</u>	<u>\$ 650,910</u>	<u>\$ (7,359)</u>	<u>\$ -</u>	<u>\$ 16,002,791</u>

The following schedule further summarizes additions to capital assets and their funding sources for the year ended June 30, 2019:

(In Thousands)

Additions:

Increases per above:

Capital assets not being depreciated	\$	857,206
Other capital assets		24,978
Total additions	\$	<u>882,184</u>

Funding Sources:

Governmental fund	\$	815,472
Donated capital assets:		
South Carolina Transportation Bank		66,712
Total funding Sources	\$	<u>882,184</u>

Included in the Department's capital assets as of June 30, 2019, is \$192.6 million that was paid for by the Association for the Southern Connector. The same amount has been capitalized by the Association as the capital asset – Interest in License Agreement with the Department. Accumulated depreciation on these assets was \$72.6 million at June 30, 2019. Depreciation expense on these assets for the year ended June 30, 2019, was \$3.6 million.

At June 30, 2019, the estimated total costs of Department projects in progress to construct, acquire and maintain various capitalized assets amounted to approximately \$8.5 million for facilities capital projects and approximately \$10.4 billion for infrastructure projects including capital and non-capital costs. The estimated costs to complete the facilities capital projects amounted to approximately \$7.2 million and the infrastructure projects amounted to approximately \$4 billion at June 30, 2019. The outstanding contractual obligations attributable to the facilities capital projects were approximately \$7 million and to the infrastructure projects were approximately \$1.6 billion. The estimated time frame for completion of these projects is from one to five or more years. The costs of the projects in progress and future projects will be funded from taxes and fees, federal grants, bond proceeds and other Department revenues. The amounts for infrastructure projects exclude those infrastructure project costs funded by the South Carolina Transportation Infrastructure Bank. The total amount of depreciation expense recorded by the Department in fiscal year 2019 was \$231.3 million.

NOTE 7. CHANGES IN LONG-TERM OBLIGATIONS:

The following schedule summarizes changes in long-term obligations of the Department for the year ended June 30, 2019:

(In Thousands)					
	Beginning Balances June 30, 2018	Increases	Decreases	Ending Balances June 30, 2019	Due Within One Year
General obligations bonds payable	\$ 142,225	\$ -	\$ 46,595	\$ 95,630	\$ 35,125
Unamortized premiums	20,403	-	6,194	14,209	4,862
Total Bonds Payable	162,628	-	52,789	109,839	39,987
Intergovernmental payable					
due to State Agency - SCTIB	177,450	-	25,393	152,057	19,130
Master lease	4,535	-	-	4,535	198
Accrued compensated absences	26,808	22,037	17,191	31,654	20,511
Net pension liability	449,060	11,655	37,154	423,561	-
Net OPEB liability	325,592	5,767	6,875	324,484	-
Total governmental activities	\$ 1,146,073	\$ 39,459	\$ 139,402	\$ 1,046,130	\$ 79,826

The Department has an additional amount due to the state agencies of \$2.8 million which is included in the current portion of due to state agencies in the accompanying statement of net position.

The following schedule summarizes principal and interest expenditures/expenses attributable to long-term obligations of the Department for year ended June 30, 2019:

(In Thousands)			
	Principal	Interest	Totals
Bonds Payable	\$ 46,595	\$ 6,576	\$ 53,171
Due to State Agency - SCTIB	25,393	4,553	29,946
Total Expenditures - Governmental Funds	\$ 71,988	11,129	\$ 83,117
Adjustments to Government-wide statements			
Change in interest accrual - bonds payable		(326)	
Total Interest Expense - Government wide		\$ 10,803	

Long-term liabilities are primarily extinguished by the Transportation Special Revenue Fund.

NOTE 8. BONDS PAYABLE:

Sections 57-11-210, et seq. of the Code (the "State Highway Bond Act"), as continued and amended by Section 11-27-30 thereof, authorized the issuance of general obligation State Highway Bonds for highway construction and related purposes backed by the full faith, credit, and taxing power of the State. State Highway Bonds are additionally secured by a pledge of so much of the revenues as may be made applicable by the General Assembly for State highway purposes from any and all taxes, fees, or licenses imposed upon individuals or vehicles for the privilege of using the public highways of the State. Such taxes and fees include the gasoline user fee, the fuel oil tax, the road tax and the motor vehicle license fees described herein. So long as any State Highway Bonds are outstanding the amount of revenues made applicable thereto by the General Assembly may not be less than the amounts needed to fund the general operations budget of the Department and meet debt service requirements for annual principal and interest payments on such bonds. Section 57-11-240 of the South Carolina Code of Laws and Article X, Section 13 of the South Carolina Constitution state that highway bonds may be issued if such bonds are additionally secured by a pledge of revenues designated by the General

Assembly for State highway purposes from taxes or licenses imposed for using the public highways of the State. The maximum annual debt service on all highway bonds shall not exceed fifteen percent of the proceeds received from the designated revenues for the fiscal year next preceding.

HIGHWAY BONDS

(In Thousands)

2017-2018 Budgetary General Fund revenues pledged for highway bonds	\$ 11,031
2017-2018 other revenues pledged for highway bonds	\$ 710,712

15% of 2017-2018 revenues pledged for highway bonds	\$ 108,261
Less: maximum annual debt service for highway bonds (2021 debt service)	\$ 39,452
Legal debt service margin at June 30, 2018--highway bonds	<u>\$ 68,809</u>

From time to time, the State Fiscal Accountability Authority may authorize the issuance of various amounts of State Highway Bonds for specific types of projects or individual projects and may authorize the total to be issued in one or more series depending on the projections of the timing of project expenditures to be funded from the proceeds.

A listing of the general obligation bonds payable at June 30, 2019, is as follows:

(In Thousands)

Issue Date	Series	Original Face Amount	Maturity Date	Interest Rates	Ending Balance
4/1/2010	2010A	\$ 299,860	6/1/2021	3.00-5.00%	\$ 47,680
12/1/2013	2013A	23,165	7/1/2021	2.00-5.00%	9,030
6/1/2014	2014A	63,410	10/1/2022	5.00%	38,920
					<u>95,630</u>
	Add, unamortized premium				14,209
	Total bonds payable				<u>\$ 109,839</u>

The following schedule summarizes the debt service requirements, including principal and interest, of bonds payable by the Department to maturity:

(In Thousands)

Year ending June 30:	Principal	Interest	Totals
2020	\$ 35,125	\$ 4,239	\$ 39,364
2021	36,985	2,467	39,452
2022	13,050	850	13,900
2023	10,470	262	10,732
Total debt service for bonds payable	<u>\$ 95,630</u>	<u>\$ 7,818</u>	<u>\$ 103,448</u>

The current portion of bonds payable at June 30, 2019, which is \$40 million includes the \$35.1 million of principal debt service payment and the \$4.9 million of unamortized premium.

Series 2010A

On April 1, 2010, the Department issued \$299.9 million in general obligation State Refunding Bonds, Series 2010A. The purpose of the issuance was for advance refunding of \$124 million of the Series 1999A bonds,

\$1.3 million of the Series 2001A bonds, and \$194.5 million of the Series 2001B bonds.

The Department deposited \$334.4 million in an escrow account with Bank of New York Mellon pursuant to an irrevocable Trust Indenture for the future retirement of the refunded bonds. The deposited funds were invested in State and Local Government securities. The \$124.0 million of Series 1999A bonds, \$1.3 million of Series 2001A bonds, and the \$194.5 million of Series 2001B are considered to be defeased and the liability for those bonds has been removed from statement of net position. The amount of defeased principal outstanding on the 2010A bond is \$0.

Series 2013A

On December 1, 2013, the Department issued \$23.2 million in general obligation State Refunding Bonds, Series 2013A. The purpose of the issuance was for an advance refunding of \$25.7 million for the Series 2003B bonds.

The Department deposited \$26.2 million in an escrow account with the Bank of New York pursuant to an irrevocable Trust Indenture for the future retirement of the refunded bonds. The deposited funds were invested in State and Local Government securities. The \$25.7 million of Series 2003B bonds are considered to be defeased and the liability for those bonds has been removed from the statement of net position. The amount of defeased principal outstanding on 2013A bond is \$0.

Series 2014A

On June 1, 2014, the Department issued \$63.4 million in general obligation State Refunding Bonds, Series 2014A. The purpose of the issuance was to advance refund \$70.9 million of the Series 2005A bonds.

The Department deposited \$75.0 million in an escrow account with the Bank of New York pursuant to an irrevocable Trust Indenture for the future retirement of the refunded bonds. The deposited funds were invested in State and Local Government securities. The \$70.9 million of Series 2005A bonds are considered to be defeased and the liability for this portion of the bonds have been removed from the statement of net position. The principal balance defeased and held in escrow for the 2014A bond is \$52.6 million as of June 30, 2019.

NOTE 9. INTERGOVERNMENTAL PAYABLE – DUE TO STATE AGENCY:

The Department entered into various intergovernmental agreements with the South Carolina Transportation Infrastructure Bank (the “Bank”) and various local governments to provide financial assistance for highway and transportation facilities projects. Details of the agreements follow in which the Department has a financial obligation.

Charleston County Project. The total estimated project costs were estimated to be \$650 million. Funding for the project consisted of a \$540 million financial assistance award by the Bank and the funding of \$110 million of expenditures by the Department and claimed as federal expenditures. In addition, the Department is contributing \$200 million to the Bank at the rate of \$8.0 million per year for 25 years without interest commencing in fiscal year 2003.

US 17 Beaufort and Colleton Counties. During fiscal year 2007, the Department and the Bank entered into an agreement to fund Phase I widening of US17 through Beaufort and Colleton Counties. Total project cost were estimated to be \$100 million. Funding consisted of \$11 million in federal dollars; \$7 million contribution from Beaufort County; and Bank assistance in the form of an \$82 million loan being repaid by the Department in annual installments of \$4.9 million including 4.44% interest for 30 years commencing in fiscal year 2009. The first loan transfer of \$53 million was made July 2008 with the remaining funds of \$29 million transferred July 2009. The remaining \$18 million was fully expended on this project.

Multi-Project Loan. During fiscal year 2006, the Department and the Bank entered into an agreement to extend the original Horry County agreement. This agreement extended an additional \$12 million to complete the Horry County Ride Projects, \$10 million to complete the Lexington project, \$10 million to complete the Beaufort project and \$62.1 million for the bridge demolition project in Charleston. The entire \$62.1 million was utilized, with an imputed interest rate of 5.025%. Annual installments of \$10 million began in 2010 and continue until 2023. On

August 20, 2009, the Bank transferred \$10 million from the Beaufort and Lexington projects to the US 17 project increasing the projects total allocation. On August 10, 2011, the Bank authorized the Department to utilize the remaining \$12 million no longer needed for the Horry County project for design build bridge replacement projects.

The following schedule summarizes changes in contributions payable – State agency (the Bank) for the year ended June 30, 2019, and account balances of each year-end:

	(In Thousands)			Ending Balance June 30, 2019	Due Within One Year
	Beginning Balance June 30, 2018	Increases	Decreases		
Horry Ride Project I Phase II	\$ 6,794	\$ -	\$ 6,794	\$ -	\$ -
Charleston County Project	71,333	-	8,000	63,333	8,000
US 17	63,836	-	2,190	61,646	2,289
Multi-Project Loan	35,487	-	8,409	27,078	8,841
Totals	<u>\$ 177,450</u>	<u>\$ -</u>	<u>\$ 25,393</u>	<u>\$ 152,057</u>	<u>\$ 19,130</u>

The Department has an additional amount due to the state agencies of \$2.8 million which is included in the current portion of due to state agencies in the accompanying statement of net position.

The following schedule summarizes the debt service requirements, including principal and interest of the Department of Transportation to maturity:

Year Ending June 30	(In Thousands)		
	Principal	Interest	Total
2020	\$ 19,130	\$ 3,850	\$ 22,980
2021	19,688	3,291	22,979
2022	19,441	2,705	22,146
2023	10,614	2,365	12,979
2024	10,733	2,247	12,980
2025-2029	38,971	9,261	48,232
2030-2034	19,517	5,382	24,899
2035-2037	13,963	978	14,941
Totals	<u>\$ 152,057</u>	<u>\$ 30,079</u>	<u>\$ 182,136</u>

NOTE 10. DEFERRED LOSS ON REFUNDING:

The advance refunding of the 2010A bonds resulted in a difference between the reacquisition price and the net carrying amounts of the old debt of \$14.2 million. This difference is reported in the accompanying financial statements as a deferred outflow of resources and is being amortized on a straight-line basis and will be charged to operations through the fiscal year ending June 30, 2021, since a call premium was pre-funded. The Department completed the advance refunding to reduce its total debt service payments over the next 11 fiscal years by approximately \$31.1 million and to obtain an economic gain of approximately \$28.8 million (the difference between the present values of the debt service payments on the old debt and the new debt). The following summarizes the deferred loss on advance refunding of the Series 2010A bonds:

(In Thousands)	
Escrow deposit	\$ 334,443
Less: Net carrying amount	<u>(320,249)</u>
Deferred loss on refunding of bonds payable	14,194
Accumulated amortization of deferred loss	<u>(13,011)</u>
Balance of unamortized deferred loss	<u><u>\$ 1,183</u></u>

Amortization of the deferred loss on refunding of bonds payable for the year ended June 30, 2019, was \$1.4 million.

The advance refunding of the 2013A resulted in a difference between the reacquisition price and the net carrying amounts of the old debt of \$96.1 thousand. This difference is reported in the accompanying financial statements as a deferred outflow and is being amortized on a straight-line basis and will be charged to operations through the fiscal year ending June 30, 2021. The Department completed the advance refunding to reduce its total debt service payments over the next 8 fiscal years by approximately \$2.6 million and to obtain an economic gain of approximately \$2.5 million (the difference between the present values of the debt service payments on the old debt and the new debt).

The following summarizes the deferred loss on advance refunding of the Series 2013A bonds:

(In Thousands)	
Escrow deposit	\$ 26,200
Less: Net carrying amount	<u>(26,104)</u>
Deferred loss on refunding of bonds payable	96
Accumulated amortization of deferred loss	<u>(71)</u>
Balance of unamortized deferred loss	<u><u>\$ 25</u></u>

Amortization of the deferred loss on refunding of bonds payable for the year ended June 30, 2019, was \$12.7 thousand.

The advance refunding of the 2014A resulted in a difference between the reacquisition price and the net carrying amounts of the old debt of \$3.9 million. This difference is reported in the accompanying financial statements as a deferred outflow and is being amortized on a straight-line basis and will be charged to operations through the fiscal year ending June 30, 2023. The Department completed the advance refunding to reduce its total debt service payments over the next 10 fiscal years by approximately \$4.3 million and to obtain an economic gain of approximately \$4.2 million (the difference between the present values of the debt service payments on the old debt and the new debt).

The following summarizes the deferred loss on advance refunding of the Series 2014A bonds:

(In Thousands)	
Escrow deposit	\$ 74,973
Less: Net carrying amount	(71,042)
Deferred loss on refunding of bonds payable	3,931
Accumulated amortization of deferred loss	(2,398)
Balance of unamortized deferred loss	<u>\$ 1,533</u>

Amortization of the deferred loss on refunding of bonds payable for the year ended June 30, 2019, was \$471.6 thousand.

NOTE 11. LEASE OBLIGATIONS:

The Department incurred approximately \$357.4 thousand in expenditures in the current fiscal year applicable to contingent lease agreements that are based on a five (5) year term in addition to a pay-per-copy arrangement. These lease agreements do not have minimum usage requirements. All contingent lease agreements are with external parties.

In March 2019, the Department entered into an agreement with TD Equipment Finance, Inc. through the State Treasurer Master Lease program to purchase energy, water, and wastewater services performance contract for the Department Headquarters Guaranteed Energy Savings Contract. The equipment has a cost of \$4.5 million and at the end of the term of the loan ownership of the equipment will transfer to the Department. The interest rate of the lease is 3.040%. For accounting purposes, it is treated as a capital lease and the equipment is included in the Department's assets and is being depreciated on the straight-line method over fourteen years. The lease is also recorded as an obligation of the Department and is included in Note 8 of the financial statements.

(in Thousands)			
Year ending June 30	Principal	Interest	Total
2020	198	228	426
2021	292	134	426
2022	301	125	426
2023	310	115	425
2024	320	106	426
2025-2029	1,753	374	2,127
2030-2033	1,361	92	1,453
Totals	<u>\$ 4,535</u>	<u>\$ 1,174</u>	<u>\$ 5,709</u>

NOTE 12. PENSION PLANS:

The South Carolina Public Employee Benefit Authority (PEBA), created July 1, 2012, and governed by an 11-member Board, is the state agency responsible for the administration and management of the various Retirement Systems and retirement programs of the state of South Carolina, including the State Optional Retirement Program and the S.C. Deferred Compensation Program, as well as the state's employee insurance programs. As such, PEBA is responsible for administering the South Carolina Retirement Systems' five defined benefit pension plans. The Retirement Funding and Administration Act of 2017, which became effective July 1, 2017, increased the employer and employee contribution rates, established a ceiling on the SCRS and PORS employee contribution rates, lowered the assumed rate of return, required a scheduled reduction of the funding periods, and addressed various governance issues including the assignment of the PEBA Board as custodian of the retirement trust funds and assignment of the RSIC and PEBA as co-trustees of the assets of the retirement trust funds. By law, the State Fiscal Accountability Authority (SFAA), which consists of five elected officials, also reviews certain PEBA Board decisions regarding the actuary of the Systems.

For purposes of measuring the net pension liability, deferred outflows and inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Systems and additions to/deductions from the Systems fiduciary net position have been determined on the accrual basis of accounting as they are reported by the Systems in accordance with generally accepted accounting principles (GAAP). For this purpose, revenues are recognized when earned and expenses are recognized when incurred. Benefit and refund expenses are recognized when due and payable in accordance with the terms of the plan. Investments are reported at fair value.

PEBA issues a Comprehensive Annual Financial Report (CAFR) containing financial statements and required supplementary information for the Systems' Pension Trust Funds. The CAFR is publicly available through the Retirement Benefits' link on PEBA's website at www.peba.sc.gov, or a copy may be obtained by submitting a request to PEBA, 202 Arbor Lake Drive, Columbia, SC 29223. PEBA is considered a division of the primary government of the state of South Carolina and therefore, retirement trust fund financial information is also included in the comprehensive annual financial report of the state.

Plan Descriptions

The South Carolina Retirement System (SCRS), a cost-sharing multiple-employer defined benefit pension plan, was established July 1, 1945, pursuant to the provisions of Section 9-1-20 of the South Carolina Code of Laws for the purpose of providing retirement and other benefits for teachers and employees of the state and its political subdivisions. SCRS covers employees of state agencies, public school districts, higher education institutions, other participating local subdivisions of government and individuals newly elected to the South Carolina General Assembly at or after the 2012 general election.

The State Optional Retirement Program (State ORP) is a defined contribution plan that is offered as an alternative to SCRS to certain newly hired employees of state agencies, institutions of higher education, public school districts and individuals first elected to the General Assembly at or after the general election in November 2012. State ORP participants direct the investment of their funds into an account administered by one of four third party record keepers.

The South Carolina Police Officers Retirement System (PORS), a cost-sharing multiple-employer defined benefit pension plan, was established July 1, 1962, pursuant to the provisions of Section 9-11-20 of the South Carolina Code of Laws for the purpose of providing retirement and other benefits to police officers and firefighters. PORS also covers peace officers, coroners, probate judges and magistrates.

Membership

Membership requirements are prescribed in Title 9 of the South Carolina Code of Laws. A brief summary of the requirements under each system is presented below.

- SCRS - Generally, all employees of covered employers are required to participate in and contribute to the system as a condition of employment. This plan covers general employees and teachers and individuals newly elected to the South Carolina General Assembly beginning with the November 2012 general election. An employee member of the system with an effective date of membership prior to July 1, 2012, is a Class Two member. An employee member of the system with an effective date of membership on or after July 1, 2012, is a Class Three member.
- State ORP - As an alternative to membership in SCRS, newly hired state, public school, and higher education employees and individuals newly elected to the S.C. General Assembly beginning with the November 2012 general election have the option to participate in the State ORP. PEBA assumes no liability for State ORP benefits. Rather, the benefits are the liability of the four third party record keepers. For this reason, State ORP assets are not part of the retirement systems' trust funds for financial statement purposes. Contributions to the State ORP are at the same rates as SCRS. A direct remittance is required from the employer to the member's account with the ORP vendor for the employee contribution and a portion of the employer contribution (5 percent). A direct remittance is also required to SCRS for the remaining portion of the employer contribution and an incidental death benefit contribution, if applicable, which is retained by SCRS.

- **PORS** - To be eligible for PORS membership, an employee must be required by the terms of his employment, by election or appointment, to preserve public order, protect life and property, and detect crimes in the state; to prevent and control property destruction by fire; or to serve as a peace officer employed by the Department of Corrections, the Department of Juvenile Justice, or the Department of Mental Health. Probate judges and coroners may elect membership in PORS. Magistrates are required to participate in PORS for service as a magistrate. PORS members, other than magistrates and probate judges, must also earn at least \$2,000 per year and devote at least 1,600 hours per year to this work, unless exempted by statute. An employee member of the system with an effective date of membership prior to July 1, 2012, is a Class Two member. An employee member of the system with an effective date of membership on or after July 1, 2012, is a Class Three member.

Benefits

Benefit terms are prescribed in Title 9 of the South Carolina Code of Laws. PEBA does not have the authority to establish or amend benefit terms without a legislative change in the code of laws. Key elements of the benefit calculation include the benefit multiplier, years of service, and average final compensation/current annual salary. A brief summary of the benefit terms for each system is presented below.

- **SCRS** - A Class Two member who has separated from service with at least five or more years of earned service is eligible for a monthly pension at age 65 or with 28 years credited service regardless of age. A member may elect early retirement with reduced pension benefits payable at age 55 with 25 years of service credit. A Class Three member who has separated from service with at least eight or more years of earned service is eligible for a monthly pension upon satisfying the Rule of 90 requirement that the total of the member's age and the member's creditable service equals at least 90 years. Both Class Two and Class Three members are eligible to receive a reduced deferred annuity at age 60 if they satisfy the five- or eight-year earned service requirement, respectively. An incidental death benefit is also available to beneficiaries of active and retired members of employers who participate in the death benefit program.

The annual retirement allowance of eligible retirees or their surviving annuitants is increased by the lesser of one percent or five hundred dollars every July 1. Only those annuitants in receipt of a benefit on July 1 of the preceding year are eligible to receive the increase. Members who retire under the early retirement provisions at age 55 with 25 years of service are not eligible for the benefit adjustment until the second July 1 after reaching age 60 or the second July 1 after the date they would have had 28 years of service credit had they not retired.

- **PORS** - A Class Two member who has separated from service with at least five or more years of earned service is eligible for a monthly pension at age 55 or with 25 years of service regardless of age. A Class Three member who has separated from service with at least eight or more years of earned service is eligible for a monthly pension at age 55 or with 27 years of service regardless of age. Both Class Two and Class Three members are eligible to receive a deferred annuity at age 55 with five or eight years of earned service, respectively. An incidental death benefit is also available to beneficiaries of active and retired members of employers who participate in the death benefit program. Accidental death benefits are also provided upon the death of an active member working for a covered employer whose death was a natural and proximate result of an injury incurred while in the performance of duty.

The retirement allowance of eligible retirees or their surviving annuitants is increased by the lesser of one percent or five hundred dollars every July 1. Only those annuitants in receipt of a benefit on July 1 of the preceding year are eligible to receive the increase.

Contributions

Contributions are prescribed in Title 9 of the South Carolina Code of Laws. If the scheduled employee and employer contributions provided in statute, or the rates last adopted by the board, are insufficient to maintain the amortization period set in statute, the board shall increase employer contribution rates as necessary.

After June 30, 2027, if the most recent annual actuarial valuation of the Systems for funding purposes shows a ratio of the actuarial value of system assets to the actuarial accrued liability of the system (the funded ratio) that is equal to or greater than eighty-five percent, then the board, effective on the following July first, may decrease the then current contribution rates upon making a finding that the decrease will not result in a funded ratio of less than eighty-five percent. If contribution rates are decreased pursuant to this provision, and the most recent annual actuarial valuation of the system shows a funded ratio of less than eighty-five percent, then effective on the following July first, and annually thereafter as necessary, the board shall increase the then current contribution rates until a subsequent annual actuarial valuation of the system shows a funded ratio that is equal to or greater than eighty-five percent.

The Retirement System Funding and Administration Act establishes a ceiling on employee contribution rates at 9 percent and 9.75 percent for SCRS and PORS respectively. The employer contribution rates will continue to increase annually by 1 percent through July 1, 2022. The legislation's ultimate scheduled employer rate is 18.56 percent for SCRS and 21.24 percent for PORS. The amortization period is scheduled to be reduced one year for each of the next 10 years to a twenty year amortization period.

Required employee contribution rates¹ are as follows:

	<u>Fiscal Year 2019</u>	<u>Fiscal Year 2018</u>
SCRS		
Employee Class Two	9.00%	9.00%
Employee Class Three	9.00%	9.00%
State ORP		
Employee	9.00%	9.00%
PORS		
Employee Class Two	9.75%	9.75%
Employee Class Three	9.75%	9.75%

Required employer contribution rates¹ are as follows:

	<u>Fiscal Year 2019</u>	<u>Fiscal Year 2018</u>
SCRS		
Employer Class Two	14.41%	13.41%
Employer Class Three	14.41%	13.41%
Employer Incidental Death Benefit	0.15%	0.15%
State ORP		
Employer Contribution ²	14.41%	13.41%
Employer Incidental Death Benefit	0.15%	0.15%
PORS		
Employer Class Two	16.84%	15.84%
Employer Class Three	16.84%	15.84%
Employer Incidental Death Benefit	0.20%	0.20%
Employer Accidental Death Program	0.20%	0.20%

¹ Calculated on earnable compensation as defined in Title 9 of the South Carolina Code of Laws.

² Of this employer contribution, 5% of earnable compensation must be remitted by the employer directly to the ORP vendor to be allocated to the member's account with the remainder of the employer contribution remitted to the SCRS.

Actuarial Assumptions and Methods

Actuarial valuations of the plan involve estimates of the reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and future salary increases. Amounts determined regarding the net pension liability are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. South Carolina state statute requires that an actuarial experience study be completed at least once

in each five-year period. An experience report on the Systems was most recently issued for the period ending June 30, 2015.

The measurement date for reporting the Department's net pension liability at June 30, 2019 is June 30, 2018. The June 30, 2018, total pension liability (TPL), net pension liability (NPL), and sensitivity information shown in this report were determined by our consulting actuary, Gabriel, Roeder, Smith and Company (GRS) and are based on an actuarial valuation performed as of July 1, 2017. The total pension liability was rolled-forward from the valuation date to the plans' fiscal year end, June 30, 2018, using generally accepted actuarial principles.

The following table provides a summary of the actuarial assumptions and methods used to calculate the TPL as of June 30, 2018.

	SCRS	PORS
Actuarial cost method	Entry age	Entry age
Investment rate of return ¹	normal 7.25%	normal 7.25%
Projected salary increases	3.0% to 12.5%(varies by service) ¹	3.5% to 9.5% (varies by service) ¹
Benefit adjustments	lesser of 1% or \$500 annually	lesser of 1% or \$500 annually
¹ Includes inflation at 2.25%		

The post-retiree mortality assumption is dependent upon the member's job category and gender. The base mortality assumptions, the 2016 Public Retirees of South Carolina Mortality table (2016 PRSC), was developed using the Systems' mortality experience. These base rates are adjusted for future improvement in mortality using published Scale AA projected from the year 2016.

Assumptions used in the determination of the June 30, 2018, TPL are as follows.

Former Job Class	Males	Females
Educators	2016 PRSC Males multiplied by 92%	2016 PRSC Females multiplied by 98%
General Employees and Members of the General Assembly	2016 PRSC Males multiplied by 100%	2016 PRSC Females multiplied by 111%
Public Safety and Firefighters	2016 PRSC Males multiplied by 125%	2016 PRSC Females multiplied by 111%

Net Pension Liability

The NPL is calculated separately for each system and represents that particular system's TPL determined in accordance with GASB No. 67 less that System's fiduciary net position. The Department's proportional share of the State's NPL totals, as of June 30, 2018 (reported at June 30, 2019), for SCRS and PORS are presented below.

Proportional Share of Net Pension Liability

(in thousands)

System	Total Pension Liability	Plan Fiduciary Net Position	Department's Net Pension Liability (Asset)	Plan Fiduciary Net Position as a Percentage of the Total Pension Liability
SCRS	\$ 921,299	\$ 498,467	\$ 422,832	54.1%
PORS	1,904	1,175	729	61.7%
Total	<u>\$ 923,203</u>	<u>\$ 499,642</u>	<u>\$ 423,561</u>	

The TPL is calculated by the Systems' actuary, and each plan's fiduciary net position is reported in the Systems' financial statements. The NPL is disclosed in accordance with the requirements of GASB 67 in the Systems' notes to the financial statements and required supplementary information. Liability calculations performed by the Systems' actuary for the purpose of satisfying the requirements of GASB Nos. 67 and 68 are not applicable for other purposes, such as determining the plans' funding requirements.

The Department's proportionate share of the net pension liability for both SCRS and PORS is as follows for the years ended June 30, 2018 and 2019:

System	June 30, 2019	June 30, 2018	Change
SCRS	1.887068%	1.992184%	-0.105116%
PORS	0.025714%	0.021430%	0.004284%

The Department's change in proportionate share of the net pension liability and related deferred inflows and outflows of resources will be amortized into pension expense over the respective average remaining service lives of each system.

Long-term Expected Rate of Return

The long-term expected rate of return on pension plan investments is based upon 30 year capital market assumptions. The long-term expected rate of returns represent assumptions developed using an arithmetic building block approach primarily based on consensus expectations and market based inputs. Expected returns are net of investment fees.

The expected returns, along with the expected inflation rate, form the basis for the target asset allocation adopted at the beginning of the 2018 fiscal year. The long-term expected rate of return is produced by weighting the expected future real rates of return by the target allocation percentage and adding expected inflation and is summarized in the table below. For actuarial purposes, the 7.25 percent assumed annual investment rate of return used in the calculation of the TPL includes a 5.00 percent real rate of return and a 2.25 percent inflation component.

Asset Class	Target Asset Allocation	Expected Arithmetic Real Rate of Return	Long Term Expected Portfolio Real Rate of Return
Global Equity	47.0%		
Global Public Equity	33.0%	6.99%	2.31%
Private Equity	9.0%	8.73%	0.79%
Equity Options Strategies	5.0%	5.52%	0.28%
Real Assets	10.0%		
Real Estate (Private)	6.0%	3.54%	0.21%
Real Estate (REITs)	2.0%	5.46%	0.11%
Infrastructure	2.0%	5.09%	0.10%
Opportunistic	13.0%		
GTAA/Risk Parity	8.0%	3.75%	0.30%
Hedge Funds (non-PA)	2.0%	3.45%	0.07%
Other Opportunistic Strategies	3.0%	3.75%	0.11%
Diversified Credit	18.0%		
Mixed Credit	6.0%	3.05%	0.18%
Emerging Markets Debt	5.0%	3.94%	0.20%
Private Debt	7.0%	3.89%	0.27%
Conservative Fixed Income	12.0%		
Core Fixed Income	10.0%	0.94%	0.09%
Cash and Short Duration (Net)	2.0%	0.34%	0.01%
Total Expected Real Return	100%		5.03%
Inflation for Actuarial Purposes			2.25%
Total Expected Nominal Return			7.28%

Discount Rate

The discount rate used to measure the TPL was 7.25 percent. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers in SCRS and PORS will be made based on the actuarially determined rates based on provisions in the South Carolina Code of Laws. Based on those assumptions, the System's fiduciary net position was projected to be available to make all the projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the TPL.

Sensitivity Analysis

The following table presents the collective NPL of the Department calculated using the discount rate of 7.25 percent, as well as what the employers' NPL would be if it were calculated using a discount rate that is 1.00 percent lower (6.25 percent) or 1.00 percent higher (8.25 percent) than the current rate.

Sensitivity of the Proportional Share of Net Pension Liability to Changes in the Discount Rate			
(In Thousands)			
System	1.00% Decrease (6.25%)	Current Discount Rate (7.25%)	1.00% Increase (8.25%)
SCRS	\$ 540,301	\$ 422,832	\$ 338,853
PORS	\$ 982	\$ 729	\$ 521

Additional Financial and Actuarial Information

Detailed information regarding the fiduciary net position of the plans administered by PEBA is available in the Systems' audited financial statements for the fiscal year ended June 30, 2018, (including the unmodified audit opinion on the financial statements). Additional actuarial information is available in the accounting and financial reporting actuarial valuation as of June 30, 2018.

Deferred Outflows (Inflows) of Resources Related to Pensions

For the year ended June 30, 2019, the Department recognized pension expense of \$39.1 million. At June 30, 2019, the Department reported deferred outflows (inflows) of resources related to pensions from the following sources:

	(In Thousands)		
		Deferred Outflows of Resources	Deferred Inflows of Resources
Pension contributions subsequent to measurement date		\$ 27,454	\$ -
Change in proportionate share of net pension liability and differences in actual and proportionate share of employer contributions		6,477	16,450
Assumption Changes		16,824	-
Differences in actual and expected experience		786	2,488
Net differences between projected and actual earnings on plan investments		6,731	-
		<u>\$ 58,272</u>	<u>\$ 18,938</u>

The Department reported approximately \$27.5 million as deferred outflows of resources related to contributions subsequent to the measurement date which will be recognized as a reduction of the net pension liability in the year ended June 30, 2020. Other amounts reported as deferred outflows (inflows) of resources will be recognized in pension expense in future years.

The following schedule reflects the amortization of the Department's proportional share of the net balance of remaining deferred outflows (inflows) of resources at June 30, 2019. Average remaining services lives of all employees provided with pensions through the pension plans at June 30, 2019 was 4.08 years for SCRS and 4.348 years for PORS.

	(In Thousands)			
Measurement Period Ending June 30,	Fiscal Year Ending June 30,	SCRS	PORS	Total
2019	2020	15,508	55	15,563
2020	2021	7,282	17	7,299
2021	2022	(9,876)	7	(9,869)
2022	2023	(1,122)	9	(1,113)
Net Balance of Deferred Outflows / Inflows of Resources		<u>11,792</u>	<u>88</u>	<u>11,880</u>

The Department made contributions to the retirement plan after the measurement date of \$27.5 million, \$26.2 million, and \$23.0 million for the years ended June 30, 2019, 2018, and 2017, respectively.

NOTE 13. POST-EMPLOYMENT BENEFITS AND OTHER THAN PENSIONS:

Plan Descriptions

The Other Post-Employment Benefits Trust Funds (OPEB Trusts), collectively refers to the South Carolina Retiree Health Insurance Trust Fund (SCRHITF) established by the State of South Carolina as Act 195, which became effective in May, 2008. The SCRHITF was created to fund and account for the employer costs of the State's retiree health and dental plans.

In accordance with Act 195, the OPEB Trust is administered by the PEBA – Insurance Benefits and the State Treasurer is the custodian of the funds held in trust. The Board of Directors of PEBA has been designated as the Trustee.

The OPEB Trust is a cost-sharing multiple-employer defined benefit OPEB plan. Article 5 of the State Code of Laws defines the plan and authorizes the Trustee to at any time adjust the plan, including its benefits and contributions, as necessary to insure the fiscal stability of the plans. In accordance with the South Carolina Code of Laws and the annual Appropriations Act, the State provides post-employment health and dental and long-term disability benefits to retired State and school district employees and their covered dependents.

Benefits

The SCRHITF is a healthcare plan that covers retired employees of the State of South Carolina, including all agencies, and public school districts. The SCRHITF provides health and dental insurance benefits to eligible retirees. Generally, retirees are eligible for the health and dental benefits if they have established at least ten years of retirement service credit. For new hires beginning employment May 2, 2008 and after, retirees are eligible for benefits if they have established 25 years of service for 100% employer funding and 15-24 years of service for 50% employer funding.

Contributions and Funding Policies

Section 1-11-710 of the South Carolina Code of Laws of 1976, as amended, requires the postemployment and long-term disability benefits to be funded through non-employer and employer contributions for active employees and retirees to the PEBA – Insurance Benefits. Non-employer contributions consist of an annual appropriation by the General Assembly and the statutorily required transfer from PEBA – Insurance Benefits reserves.

The SCRHITF is funded through participating employers that are mandated by State statute to contribute at a rate assessed each year by the Department of Administration Executive Budget Office on active employee covered payroll. The covered payroll surcharge for the year ended June 30, 2019 was 5.50 percent. The South Carolina Retirement System collects the monthly covered payroll surcharge for all participating employers and remits it directly to the SCRHITF. Other sources of funding for the SCRHITF also include the implicit subsidy, or age-related subsidy inherent in the healthcare premiums structure. The implicit subsidy represents a portion of the health care expenditures paid on behalf of the employer's active employees. For purposes of GASB Statement No. 75, this expenditure on behalf of the active employee is reclassified as a retiree health care expenditure so that the employer's contributions towards the plan reflect the underlying age-adjusted, retiree benefit costs. Non-employer contributions include the mandatory transfer of accumulated PEBA – Insurance Benefits' reserves and the annual appropriation budgeted by the General Assembly. It is also funded through investment income. During the year ended June 30, 2019, the Department contributed \$10.9 million to the SCRHITF.

For purposes of measuring the net OPEB liability, deferred outflows and inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the OPEB Trust, and additions to and deductions from the OPEB Trust fiduciary net position have been determined on the same basis as they were reported by the OPEB Trust. For this purpose, revenues are recognized when earned and expenses are recognized when incurred. Therefore, benefit and administrative expenses are recognized when due and payable. Investments are reported at fair value.

PEBA – Insurance Benefits issues audited financial statements and required supplementary information for the OPEB Trust Funds. This information is publicly available through the PEBA – Insurance Benefits’ link on PEBA’s website at www.peba.sc.gov or a copy may be obtained by submitting a request to PEBA – Insurance Benefits, 202 Arbor Lake Drive, Columbia, SC 29223. PEBA is considered a division of the primary government of the state of South Carolina and therefore, OPEB Trust fund financial information is also included in the comprehensive annual financial report of the state.

Actuarial Assumptions and Methods

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Actuarially determined amounts are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

Projections of benefits for financial reporting purposes are based on the substantive plans (as understood by the employer and plan participants) and include the types of benefits provided at the time the valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point.

Additional information as of the latest actuarial valuation for SCRHITF:

Valuation Date:	June 30, 2017
Actuarial Cost Method:	Entry Age Normal
Inflation:	2.25%
Investment Rate of Return:	4.00%, net of OPEB Plan investment expense; including inflation
Single Discount Rate:	3.62% as of June 30, 2018
Demographic Assumptions:	Based on the experience study performed for the South Carolina Retirement Systems for the 5-year period ending June 30, 2015
Mortality:	For healthy retirees, the 2016 Public Retirees of South Carolina Mortality Table for Males and the 2016 Public Retirees of South Carolina Mortality Table for Females are used with fully generational mortality projections based on Scale AA from the year 2016. Multipliers are applied to the base tables based on gender and employment type.
Health Care Trend Rate:	Initial trend starting at 6.75% and gradually decreasing to an ultimate trend rate of 4.15% over a period of 14 years
Retiree Participation:	79% for retirees who are eligible for funded premiums; 59% participation for retirees who are eligible for Partial Funded Premiums; 20% participation for retirees who are eligible for Non-Funded Premiums
Notes:	There were no benefit changes during the current year; the discount rate changed from 3.59% as of June 30, 2017 to 3.62% as of June 30, 2018

Roll Forward Disclosures

The actuarial valuation were performed as of June 30, 2017. Update procedures were used to roll forward the total OPEB liability to June 30, 2018, the Department’s measurement date.

Net OPEB Liability

The Net OPEB Liability (NOL) is calculated separately for each OPEB Trust Fund and represents that particular Trust's Total OPEB Liability (TOL) determined in accordance with GASB No. 74 less that Trust's fiduciary net position. The allocation of each employer's proportionate share of the collective Net OPEB Liability and collective OPEB Expense was determined using the employer's payroll-related contributions over the measurement period. This method is expected to be reflective of the employer's long-term contribution effort.

The following table represents the components of the Departments proportional share of the net OPEB liability as of June 30, 2018:

Proportional Share of Net OPEB Liability					
(In Thousands)					
Fiscal Year Ending	System	Total OPEB Liability	Plan Fiduciary Net Position	Net OPEB Liability	Plan Fiduciary Net Position as a Percentage of the Total OPEB Liability
June 30, 2018	SCRHITF	352,341	27,857	324,484	7.91%

The TOL is calculated by the Trusts' actuary, and each Trust's fiduciary net position is reported in the Trust's financial statements. The NOL is disclosed in accordance with the requirements of GASB No. 74 in the Trusts' notes to the financial statements and required supplementary information. Liability calculations performed by the Trusts' actuary for the purpose of satisfying the requirements of GASB Nos. 74 and 75 and are not applicable for other purposes, such as determining the Trusts' funding requirements.

At June 30, 2019, the Department reported a liability of 324.5 million for its proportionate share of the net OPEB liability. The net OPEB liability was measured as of June 30, 2018, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of June 30, 2017, and rolled forward to June 30, 2018. The Department's proportion of the net OPEB liability was based on a projection of the Department's long-term share of contributions to the OPEB plan relative to the projected contributions of all participating entities, actuarially determined. At June 30, 2018, the Department's proportion was 2.289842%, a decrease of 0.1139279% from the prior year proportion.

Single Discount Rate

The Single Discount Rate of 3.62% was used to measure the total OPEB liability for the SCRHITF. The accounting policy for this plan is to set the Single Discount Rate equal to the prevailing municipal bond rate, the Fidelity 20-Year Municipal GO AA Index of June 30, 2018. Due to the plan's investment and funding policies, the difference between a blended discount rate and the municipal bond rate would be less than several basis points (several hundredths of one percent).

Long-term Expected Rate of Return

The long-term expected rate of return represents assumptions developed using an arithmetic building block approach primarily based on consensus expectations and market based inputs. The expected returns, along with the expected inflation rate, form the basis for the target asset allocation adopted at the beginning of the 2017 fiscal year. The long-term expected rate of return is produced by weighting the expected future real rates of return by the target allocation percentage and adding expected inflation. This information is summarized in the following table:

Asset Class	Target Asset Allocation	Expected Arithmetic Real Rate of Return	Allocation-Weighted Long-Term Expected Real Rate of Return
U.S. Domestic Fixed Income	80.0%	2.09%	1.67%
Cash equivalents	20.0%	0.84%	0.17%
Total	100.0%		1.84%
Expected Inflation			2.25%
Total Return			4.09%
Investment Return Assumption			4.00%

Sensitivity Analysis

The following table presents the SCRHITF's net OPEB liability calculated using a Single Discount Rate of 3.62%, as well as what the plan's net OPEB liability would be if it were calculated using a Single Discount Rate that is one percent lower or one percent higher:

Sensitivity of the Proportional Share of Net OPEB Liability to Changes in the Single Discount Rate			
OPEB Trust	1.00% Decrease (2.62%)	Current Discount Rate (3.62%)	1.00% Increase (4.62%)
SCRHITF	\$ 382,273	\$ 324,484	\$ 277,901

Regarding the sensitivity of the SCRHITF's net OPEB liability to changes in the healthcare cost trend rates, the following table presents the plan's net OPEB liability, calculated using the assumed trend rates as well as what the plan's net OPEB liability would be if were calculated using a trend rate that is one percent lower or one percent higher:

Sensitivity of the Proportional Share of Net OPEB Liability to Changes in Healthcare Cost Trend Rate			
OPEB Trust	1.00% Decrease	Current Healthcare Cost Trend Rate	1.00% Increase
SCRHITF	\$ 266,998	\$ 324,484	\$ 398,803

OPEB Expense and Deferred Outflows and Inflows of Resources

For the year ended June 30, 2019, the Department recognized OPEB expense of \$16.3 million. At June 30, 2019, the Department reported deferred outflows and inflows of resources related to OPEB from the following sources:

(In Thousands)

	Deferred Outflows of Resources	Deferred Inflows of Resources
OPEB contributions subsequent to measurement date	\$ 10,864	\$ -
Net differences between projected and actual experience	4,861	113
Assumption Changes	-	26,423
Net difference between projected and actual investment experience	1,244	-
Changes in proportionate share	-	14,516
	<u>\$ 16,969</u>	<u>\$ 41,052</u>

Contributions subsequent to the measurement date of \$10.9 million were reported as deferred outflows of resources related to OPEB and will be recognized as a reduction of the net OPEB liability in the year ended June 30, 2020. Other amounts reported as deferred outflows and inflows of resources related to OPEB will be recognized in OPEB expense as follows. Average remaining services lives of all employees provided with OPEB through the June 30, 2018 was 7.203 years for SCRHTF:

(In Thousands)

Measurement Period Ending June 30,	Fiscal Year Ending June 30,	SCRHTF
2019	2020	\$ (6,214)
2020	2021	(6,214)
2021	2022	(6,214)
2022	2023	(6,348)
2023	2024	(6,559)
Thereafter		(3,398)
		<u>\$ (34,947)</u>

NOTE 14. DEFERRED COMPENSATION PLANS:

Several optional deferred compensation plans are available to State employees and employers of its political subdivisions. Certain employees of the Department have elected to participate. The multiple-employer plans, created under Internal Revenue Code Section 457, 401(k), 403(b), and Roth 401(k) are administered by third parties and are not included in the CAFR of the State of South Carolina. Compensation deferred under the plans is placed in trust for the contributing employee.

The State has no liability for losses under the plans. Employees may withdraw the current value of their contributions when they terminate State employment. Employees may also withdraw contributions prior to termination if they meet requirements specified by the applicable plan. The Department has not made any contributions to these plans.

NOTE 15. TRANSACTIONS WITH STATE ENTITIES / RELATED PARTIES:

The Department has significant transactions with the State and various State agencies. The Department purchases goods and services from various State agencies. Total purchases from State agencies were approximately \$25.3 million for the year ended June 30, 2019. The Department sells supply items and provides services for various State agencies. Total sales to State agencies were approximately \$1.5 million for the year ended June 30, 2019.

The gasoline user fees, special fuels user fees and max sales taxes are collected by the South Carolina Department of Revenue (DOR) and remitted on a monthly basis. The user fees and sales taxes collected by DOR for the Transportation Special Revenue Fund amounted to \$727.3 million for the year ended June 30, 2019, of which \$79.7 million was accrued as a receivable at June 30, 2019. Gasoline user fees revenues collected by DOR for the County Transportation Program Agency Fund amounted to \$83.4 million for the year ended June 30, 2019. The Department transferred \$17.6 million from the Infrastructure Maintenance Trust Fund to the County Transportation Program.

The Department participates in the International Fuel Tax Agreement (IFTA) program. This program is an agreement between the lower 48 states of the United States and the Canadian provinces, to simplify the reporting of fuel use by motor carriers that operate in more than one jurisdiction. Alaska, Hawaii, and the Canadian territories do not participate. An operating carrier with IFTA receives an IFTA license and two decals for each qualifying vehicle it operates. The carrier files a quarterly fuel tax report. This report is used to determine the net tax or refund due and to redistribute taxes from collecting states to states that it is due. This tax is required for motor vehicles used, designed, or maintained for transportation of persons or property and:

- Having two axles and a gross vehicle weight rating or registered gross vehicle weight in excess of 26,000 pounds, and/or
- Having three or more axles regardless of weight, and/or
- Is used in combination, when the weight of such combination exceeds 26,000 pounds gross vehicle or registered gross vehicle weight.

Exceptions exist for Recreational Vehicles (such as motor homes, pickup trucks with attached campers, and buses when used exclusively for personal pleasure by an individual). Some states have their own exemptions that often apply to farm vehicles or government vehicles. Additional information about the IFTA can be found at <http://www.iftach.org/>.

The calculation of net amount owed or due is performed by this central organization. This calculation has historically resulted in a net amount due from the Department to the central organization. The Department remitted \$18.8 million of fuel oil user fee revenue to the South Carolina Department of Motor Vehicles ("DMV") in fiscal year 2019 for the IFTA calculation. The DMV then remits that amount to the central IFTA organization for redistribution to other member states. The Department remitted \$16.9 million in FY 2019 for the same calculation.

Services received at no cost from the various state agencies, personnel management, assistance in the preparation of the State Budget, review and approval of certain budget amendments, procurement services, and other centralized functions.

Significant payments were made to other state agencies for retirement plan contributions and health insurance premiums, insurance coverage, office supplies, printing, telephone, and inter-agency mail. The amounts of expenditures applicable to related party transactions are not readily available.

Workers' compensation insurance premiums for the fiscal year 2019 of \$7 million were paid to the State Accident Fund and \$54.8 thousand was paid for Unemployment Insurance, to the South Carolina Unemployment Trust Fund. The Department provided no material services free of charge to other State agencies during the fiscal year.

See Note 9 regarding transactions resulting from intergovernmental agreements entered into by the Department, the Bank, and other local governments. The Department provided the Bank administrative services, clerical assistance, and project oversight during fiscal year 2019 for which it was paid \$797 thousand. The Bank also reimbursed the Department \$23 million in direct project costs. Allocations to other entities - State agency represented amounts paid to the Bank and totaled \$28.6 million for the year ended June 30, 2019. The payments were from gas user fee collections and represented an amount not to exceed the one cent per gallon collected in accordance with Section 11-43-160 of the Code for the on-going funding of construction and maintenance of highways.

The Department received \$10 million from the Bank in accordance with a 2009 contractual agreement between Horry County, the Bank, and the Department. This amount has been recorded as unearned revenue as the \$10 million must be spent on specific infrastructure projects. Eligible costs of \$3.7 million have been incurred and \$6.3 million are remaining.

Additionally, the Bank makes quarterly payments to the Department, and Department makes monthly payments to the Bank in accordance with an agreement between Horry County, the Bank, and the Department. In the agreement, the Department was assigned the payments originally assigned to Horry County in order to guard against Horry County defaulting on their project loans with the Bank. The amount paid to and received from the Bank was \$4.7 million for the year ended June 30, 2019.

A summary of intergovernmental payables to other State agencies in the governmental fund balance sheet at June 30, 2019 is as follows:

(In Thousands)	
Due To / Description	
Archives & History Department	\$ 9
Department Of Administration	185
Department Of Motor Vehicles	159
Department Of Natural Resources	127
Department Of Revenue & Taxation	1
Department Of Public Safety	751
Department Of Corrections	67
State Infrastructure Bank	1,494
SFAA Administration	9
Other state agencies	1
	<u>\$ 2,803</u>

NOTE 16. FEDERAL GRANTS:

The Department has grants and reimbursable contracts with the Federal government and the South Carolina Emergency Management Division (SCEMD) for the funding of costs related to the programs described in the grants. These funds are subject to audit and/or adjustment by the various funding sources. The Department does not expect any significant impact should grantors audit and/or adjust reimbursement amounts.

NOTE 17. RISK MANAGEMENT:

The Department is exposed to various risks of loss and maintains State or commercial insurance coverage for each of those risks. Management believes such coverage is sufficient to preclude any significant uninsured losses for the covered risks. There were no significant reductions in insurance coverage from that carried in the prior year. Settled claims have not exceeded this coverage in the prior three years. The Department pays insurance premiums to certain other State agencies and commercial insurers to cover risks that may occur in normal operations. The insurers promise to pay to or on behalf of the insured for covered economic losses sustained during the policy period in accord with insurance policy and benefit program limits except for deductibles.

Several State funds accumulate assets and the State itself assumes substantially all risks for the following:

1. Claims of State employees for unemployment compensation benefits (Department of Employment and Workforce);
2. Claims of covered employees for workers' compensation benefits for job-related illnesses or injuries (State Accident Fund);
3. Claims of covered public employees for health and dental insurance benefits (Public Employee Benefit Authority – Insurance Benefits); and
4. Claims of covered public employees for long-term disability and group-life insurance benefits (Public Employee Benefit Authority – Insurance Benefits).

The State offers two self-insured health plans and a Tricare Supplemental plan to qualified employees. Additionally, all other coverages (such as dental, vision, life and long-term disability) are extended through the State's insurance offerings with premiums being remitted to the PEBA.

The Department and other entities pay premiums to the State's Insurance Reserve Fund (IRF), which issues policies, accumulates assets to cover the risks of loss, and pays claims incurred for covered losses related to the following assets, activities, and/or events:

Theft of, damage to, or destruction of assets	Data processing equipment
Motor Vehicles	Business Interruptions
Real property and contents	Torts
Medical malpractice claims against covered employee for nurse.	

The IRF is a self-insurer and purchases reinsurance to obtain certain services and specialized coverage and to limit losses in the areas of certain property and equipment and auto liability. Reinsurance permits partial recovery of losses from re-insurers, but the IRF remains primarily liable. The IRF's rates are determined actuarially. State agencies and other entities are the primary participants in the State's Health and Disability Insurance Fund and IRF.

The Department self-insures itself for any losses because it feels the likelihood of losses is remote. The Department has not transferred the portion of the risk of loss related to insurance policy deductibles and limits for capital assets and fidelity overages to a State or commercial insurer.

The Department has not reported an estimated claims loss expenditure, and the related liability at June 30, 2019, based on the requirements of GASB Statement No. 10 and No. 30 which state that a liability for claims must be reported only if information prior to issuance of the financial statements indicates that it is probable that an asset has been impaired or a liability has been incurred on or before June 30, 2019, and the amount of the loss is reasonably estimable. Liabilities include an amount for incurred but not reported (IBNR) losses when it is probable a claim will be asserted. Claims liabilities when recorded are based on estimates of the ultimate cost of settling known but not paid claims and IBNR claims at June 30 using past experience adjusted for factors that would modify past experience.

In management's opinion, claims losses in excess of insurance coverage are unlikely and, if incurred, would be insignificant to the Department's financial position. Furthermore, there is no evidence of asset impairment or other information to indicate that a loss expenditure and liability should be recorded and, therefore, no loss accrual has been recorded.

NOTE 18. CONTINGENCIES AND SUBSEQUENT EVENTS:

CONTINGENCIES:

The Department is a defendant in various lawsuits arising from the conduct of its normal business primarily regarding rights-of-way. Although any litigation has an element of uncertainty, it is management's and legal counsel's opinions that the outcome of any litigation pending or threatened, or the combination thereof, will not have a materially adverse effect on the financial position of the Department.

In September 2018, South Carolina experienced widespread flooding in the northeast portion of the state as a result of Hurricane Florence. This event brought heavy rainfall resulting in overflowing rivers, over 200 road and bridges closures and damaged roadways. The Department conducted thorough inspections of all impacted roads and bridges and began recovery of the State Highway System. The Department has incurred costs through June 30, 2019, of \$32.8 million of which \$10.2 million has been received in federal assistance. Additional federal assistance based upon eligibility is expected to be approximately \$8.6 million as well as \$2.3 million of state funds approved by the General Assembly for Federal Emergency Management matching funds.

During September 2017, South Carolina experienced inclement weather as Hurricane Irma impacted the southern United States. This event caused wind, surge damage and flooding to the coast. The Department has incurred costs through June 30, 2019, of \$4.9 million of which \$1.1 million has been received in federal assistance and \$383 thousand in state funds approved by the General Assembly for Federal Emergency Management matching funds. Additional federal assistance based upon eligibility is expected to be approximately \$516 thousand along with \$172 thousand of state funds

In October 2016, Hurricane Matthew made landfall in McClellanville, SC as a Category 1 storm with sustained winds of 75 miles per hour. This event caused wind and surge damage to the lower part of the coast and wind and flooding damage to the northern part of the coast. The Department conducted thorough inspections of all bridges and roads and began recovery of the State Highway System. The Department has incurred costs through June 30, 2019, of \$74.9 million of which \$51.3 million has been received in Federal assistance and \$8.8 received from funds approved by the General Assembly for Federal Emergency Management matching funds. Additional federal assistance based upon eligibility is expected to be approximately \$6 million along with \$1 million state funds approved by the General Assembly for Federal Emergency Management matching funds.

South Carolina experienced a statewide emergency event of significant rainfall resulting in widespread flooding in October 2015. Total damages on the State Highway System were estimated to be \$137 million and many costs are eligible for federal assistance from Federal Highway Administration and Federal Emergency Management. During the 2016 Legislative Session, The General Assembly provided funding in the amount of \$49 million which was to assist the Department in the recovery and repair process and provide required federal assistance matching funds. Through June 30, 2019, the Department has incurred costs of \$123.3 million of which \$80.6 million has been received in federal assistance. Additional federal assistance of \$12 million is expected and will be based upon total costs and their federal assistance eligibility.

During the 2017 Legislative Session Act 40, the "Roads Bill", was adopted which provides the Department with the first sustainable and significant increase in revenue in the 30 years.

The new revenues are to be largely allocated specifically to the long-term maintenance and preservation of the State system. Over the next ten years, with the assistance of these funds, the Department will improve the "worst of the worst" dangerous rural roads, replace fifty percent of the State's structurally deficient bridges, resurface and rebuild fifty percent of the State's highways and embark on Interstate widening projects. At full implementation, the 2017 Roads Bill will add an estimated additional \$600 million for South Carolina infrastructure. The gas tax increased by 2 cents a year, beginning July 2017, and will continue to increase by 2 cents per year for the next 6 years for a total of 12 cents by July 2022.

NOTE 19. COMPONENT UNIT DISCLOSURES

NOTE 19A. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Reporting Entity

The Association is a South Carolina nonprofit corporation organized as a “public benefit corporation” under the South Carolina Nonprofit Corporation Act of 1994. The Articles of Incorporation of the Association were originally filed with the South Carolina Secretary of State on January 12, 1996, and were amended by a filing on March 5, 1997. The Internal Revenue Service has issued a letter dated October 20, 1997, determining that the Association is an exempt organization that is not a private foundation under Section 501(c)(3) of the Internal Revenue Code of 1986, as amended. The Association was formed to assist the Department in the financing, acquisition, construction, and operation of turnpikes, highway projects, and other transportation facilities.

The Association’s operations are governed by a license agreement (the Original License Agreement as amended, the “Revised License Agreement”) with the Department that granted the Association rights and obligations to finance, acquire, construct, and operate an approximately 16 mile fully controlled access toll highway (the “Southern Connector”). The Association originally financed construction of the Southern Connector by issuing toll road revenue bonds in 1998. In 2011, in connection with implementation of its Debt Adjustment Plan pursuant to its Chapter 9 Bankruptcy case, the Association exchanged its 1998 Bonds for new toll road revenue bonds (the “2011 Bonds”). The Association’s Debt Adjustment Plan encompasses a First Amended and Restated Master Indenture of Trust and a First Supplemental Indenture of Trust (collectively, the “Amended Trust Indenture”) and the Revised License Agreement, all of which became effective April 21, 2011. Following a mandatory exchange (subject to Bondholder opt out of the exchange) of certain of its 2011 Pro-Rata Term bonds for 2011 By-Lot Term Bonds and payment of outstanding issuance costs of the 2011 Bonds, the Association’s bankruptcy proceedings were finalized on August 27, 2012, when the United States Bankruptcy Court issued the Final Decree closing the Association’s Bankruptcy case.

The State of South Carolina Office of Comptroller General has determined that the Association is a component unit of the State of South Carolina and of the Department because of its fiscal dependence upon the Department. The Association is governed by a Board of Directors, the members of which are subject to approval of the Department.

The financial statements of the Association have been prepared in conformity with accounting principles generally accepted in the United States of America (“GAAP”). For the purpose of applying GAAP, the Association’s management has determined that the Association should be treated as a governmental entity. The GASB, which has jurisdiction over accounting and financial reporting standards applicable to governmental entities, and the Financial Accounting Standards Board (“FASB”), which has jurisdiction over such standards applicable to nongovernmental entities, have agreed on a definition of a governmental entity that is to be used when determining whether governmental GAAP is applicable. Since (a) the Association is a public benefit corporation, (b) the members of the Association’s Board of Directors are subject to the approval of the Department, and (c) upon dissolution of the Association, all of the Association’s net position will revert to the Department, the Association meets the criteria set forth in the definition of a governmental entity. Accordingly, the accompanying financial statements of the Association have been prepared in accordance with GAAP applicable to governmental unit proprietary funds.

The Association has no component units.

Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The Association is a proprietary fund type and operates as an enterprise fund. The Association uses the economic resources measurement focus and the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred. Enterprise Funds are used to account for operations (a) that are financed and operated in a manner similar to private business enterprises — where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis are to be financed or recovered primarily through user charges; or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

Cash and Cash Equivalents

The Association considers all investment with maturities of three months or less when purchased to be cash equivalents. The amount shown in the financial statements as “cash and cash equivalents” of the Association represent cash on hand, deposits in banks, and funds invested in open ended money market mutual funds.

Investments

The Association’s Trust Indenture contains provisions requiring all bond proceeds and toll revenues received by the Association to be held in trust. Such monies held in the 2011 Trust Fund Accounts are expended in accordance with Trust Indenture guidelines. All monies held in the 2011 Trust Fund Accounts that are not insured by the FDIC must be secured by and/or invested in investment securities as defined in the Trust Indenture. Investment securities include, but are not limited to, direct obligations of, or obligations guaranteed by, the United States of America or an agency thereof.

The Association’s investments are stated at fair value and categorized within the fair value hierarchy established under GASBS No. 72. For short-term, highly liquid instruments that have a remaining maturity of one year or less at the time of purchase, such as the Association’s 2016 United States Treasury Note, the investments’ fair value is generally equivalent to amortized cost. The fair value hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets. Level 2 inputs are significant other observable inputs. Level 3 inputs are significant unobservable inputs. Gains or losses that result from changes in fair value are included in nonoperating revenues or expenses.

Capital Assets

All capital and intangible assets, including the Association’s intangible interest in its License Agreement with the Department, are stated at cost or at acquisition value at the time of donation. The Association generally follows capitalization policies recommended by the State Comptroller General.

Pursuant to this policy, equipment and vehicles with individual or group costs greater than \$5 thousand and intangible assets (including software) with costs generally in excess of \$100 thousand are capitalized. Equipment and vehicle depreciation is computed using the straight-line method over the equipment’s estimated useful life between four and ten years, or the vehicle’s estimated useful life of five years. The Association’s intangible software is amortized over three to five years. The Association’s intangible interest in its License Agreement with the Department through its expiration in 2051 on a straight-line basis. When capital assets are disposed of, the cost and accumulated depreciation/amortization are removed from the books. The resulting gain or loss is included in nonoperating revenues or expenses.

Bonds Payable, Bond Discounts, Bond Premiums and Bond Issuance Costs

The current and noncurrent portions of bonds payable are recorded as liabilities in the accompanying Statement of Net Position. Bond issuance costs, excluding those related to prepaid insurance costs, are expensed as incurred.

Interest in License Agreement with the Department

Upon confirmation by the Bankruptcy Court of and as a means of implementing the Association’s Debt Adjustment Plan, the Association entered into a revised License Agreement with the Department, which became effective April 21, 2011. The revised License Agreement specifies that any terms of the original License Agreement that are not amended or modified by the revised License Agreement remain in effect.

The revisions to the original License Agreement include (1) requiring the Association to make periodic deposits into the 2011 R&R Fund, (2) modification of the Association’s responsibility for performance and payment of highway maintenance, repair and renewal, (3) elimination of License Fees payable to the Department, (4) modification of the manner in which toll rates are set, and (5) prohibiting the Department from terminating the License Agreement for any insolvency of or failure by the Association to pay or perform its obligations due to insufficient toll revenues.

Under the License Agreement, the Department is responsible for performance and payment of all highway maintenance of the Southern Connector. As defined in the License Agreement, highway maintenance includes all maintenance, repair, renewal, replacement, enhancement, resurfacing and restoration of the Southern Connector. The Association is not required to perform or pay for any highway maintenance of the Southern Connector.

The Association's sole obligation related to highway maintenance is to make the periodic deposits into the 2011 R&R Fund. The Association's inability to make deposits into the 2011 R&R Fund due to insufficiency of toll revenues will not result in a default under the License Agreement, nor will any resulting nonpayments constitute arrearages requiring deposits to the 2011 R&R Fund from future Distributable Cash.

Once the Department has incurred highway maintenance costs relating to the Southern Connector, the Department may, on a quarterly basis, submit to the Association a requisition for reimbursement and supporting documentation of such highway maintenance costs to be paid from monies deposited in the 2011 R&R Fund. The Association shall in turn request the 2011 Trustee to pay to the Department such amounts requested for reimbursement from the 2011 R&R Fund.

The Association has or will appoint at its expense an Association Engineer to perform an inspection of the Southern Connector to identify, review, monitor and report highway maintenance issues and needs, and the Association Engineer may estimate the costs of addressing those issues and needs, and assess the appropriate timing of performing related maintenance activities. The parties will collaborate with the Department to schedule necessary highway maintenance activities.

Under the Association's Debt Adjustment Plan, toll rates were initially set at amounts set forth in the Stantec Traffic Study as defined in the License Agreement. Subsequent revisions of the Southern Connector toll rates are permitted or required in certain circumstances as prescribed by the terms of the Association's Trust Indenture and the License Agreement.

Any revisions to the toll rates shall require a toll rate study to be performed by a qualified independent traffic and revenue consultant selected by the Association. The consultant will study the toll rates charged for use of the Southern Connector, the past and future projected traffic and other relevant factors in order to determine the toll rates which, in the opinion of the consultant, will maximize Southern Connector toll revenues over a projected period of at least five years.

Prior to commencement of the toll rate study, the Association must submit the name and a summary of qualifications of the selected independent traffic and revenue consultant to the Department for approval. As prescribed in the License Agreement, the Department may object to the Association's selection of a consultant on the basis of lack of expertise or qualifications and propose at least one alternate consultant considered acceptable by the Department for the performance of the toll rate study.

Once the toll rate study has been completed by the independent traffic and revenue consultant, the Association will deliver a copy of such toll rate study to the Department and the 2011 Bonds Trustee, and, at the Association's request, the Department will take other steps as necessary to implement the recommended revisions to the Southern Connector toll rates.

The License Agreement specifies that neither the Department nor the State of South Carolina is responsible for determining whether the toll rates charged by the Association are adequate to satisfy the Association's obligations to third parties.

The License Agreement allows the Association to grant toll rate discounts to encourage the use of the electronic toll collection system or to provide an incentive to fleet purchasers. Any such discounts will not be deemed a revision of toll rates.

The first toll rate study required since the effective date of the Association's Debt Adjustment Plan was performed during 2015. Accordingly, in January 2016, the Association implemented the new toll rates recommended in the toll rate study.

The License Agreement shall expire on July 22, 2051, or upon repayment, redemption or defeasance of the 2011 Bonds and all other project debt. The License Agreement also includes other termination provisions, but specifically states that the failure of the Association to pay any amounts owing or to perform any obligations under the License Agreement due to insufficient toll revenues shall not be an event of default under the License Agreement.

Provisions are included to extend the License Agreement's term by any period equal to any length of time during which toll revenues are impaired due to events of force majeure, or upon written agreement by the Association and the Department.

Under the License Agreement, the Department at all times retains fee simple title to the Southern Connector, all tolling facilities and all real property and improvements thereon. All machinery, equipment, furniture, fixtures and other personal property are the sole property of the Association. Neither the State of South Carolina nor any political subdivision or agency thereof (including, without limitation, the Department, the County of Greenville, South Carolina, and the City of Greenville, South Carolina) have any liability whatsoever for payment of any Bonds or any other obligations secured by the License Agreement.

Restricted Assets

The Association is bound by an Amended Trust Indenture which contains provisions to establish certain funds and accounts to be held by the Trustee. The Trust Indenture's terms define the amounts that may be deposited into the Funds and Accounts, and restrict payments from such Funds and Accounts. The amounts held in these funds are presented as restricted assets.

Net Position

Proprietary Fund equity is classified as net position (deficit) and is displayed as the following three components:

Net investment in capital assets — Consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.

Restricted net position — consists of certain assets, reduced by liabilities related to those assets. Assets included in this category of net position include those with constraints placed on their use either by (1) external groups such as creditors, grantors, contributors, or laws or regulations of other governments; or (2) law through constitutional provisions or enabling legislation. In all cases, if individual restricted net position categories are negative, the negative balance is eliminated and reclassified against unrestricted net position.

Unrestricted net position — all other net position that does not meet the definition of "restricted" or "net investment in capital assets."

Unless otherwise dictated in the Amended Trust Indenture, the Association's policy is to first apply restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net position are available.

The Association's net deficit at December 31, 2018, represents accumulated shortfalls since commencement of operations because toll revenues have been insufficient to cover interest accretions on the Association's Bonds. Such accretions are not payable from current toll revenues, but from those to be received in future years.

NOTE 19B. DEPOSITS AND INVESTMENTS:

The following schedule reconciles deposits and investments within the footnotes to the amounts in the financial statements:

(In Thousands)			
Component Unit	Financial Statements		Footnotes
Unrestricted current assets:			
Cash and cash equivalents	\$	1,725	Bank Deposits \$ 1,725
Restricted noncurrent assets:			
Cash and cash equivalents		12,047	-
Restricted noncurrent assets:			
Investments		-	Investments 12,047
Total component unit	\$	13,772	\$ 13,772

The Association's Amended Trust Indenture requires that all trust fund bank deposits that are not insured by the FDIC be collateralized by investment securities. The types of investment securities that may be used as collateral are: direct obligations of, or obligations the principal and interest of which are unconditionally guaranteed by, the United States of America or certain of its agencies; repurchase agreements with underlying securities that are obligations of, or guaranteed by, the United States of America or certain of its agencies; certain obligations of, or guaranteed by, any state within the territorial United States of America; agreements that provide for the forward delivery of any securities previously described; investments in money market mutual funds rated "AAAm", "AAm", "AAAmG", or better; unsecured investment agreements with any bank or financial institution, the unsecured debt or counterparty rating of which is "investment grade" rated as of the date of acquisition; and any other obligation which, at the date of acquisition, is rated by a rating agency in one of the two highest rating categories for long-term obligations or in the highest rating category for short-term obligations.

Deposits

Custodial Credit Risk for Deposits: Custodial credit risk for deposits is the risk that, in the event of a bank failure, the Association's deposits might not be recovered. The Association does not have a formal deposit policy for custodial credit risk, but follows the guidelines outlined in the Association's Trust Indenture (as noted earlier) which are consistent with federal and State law. At December 31, 2018, approximately \$1.4 million of the Association's bank balances of approximately \$1.6 million (with a carrying value of \$1.7 million) were uninsured and uncollateralized. The South Carolina State Treasurer held none of the deposits noted above.

Investments

The South Carolina State Treasurer held none of the investments noted below. As of December 31, 2018, the Association had the following investments as defined by GASB:

(In Thousands)					
Investment Type	Credit Rating [^]	Fair Value Level	Fair Value	Percentage of Total Investments	Weighted Average maturity (in Years)
December 31, 2018:					
Money Market Mutual Funds	AAAm, Aaa-mf, AAAmmf	1	\$ 12,047	100.00%	0.066

([^]) If available, credit ratings are from Standard & Poor's, Moody's Investors Service, and Fitch Ratings.

Interest Rate Risk:

The Association does not have a formal policy limiting investment maturities that would help manage its exposure to fair value losses from increasing interest rates, but follows the investment requirements outlined in the Association's Amended Trust Indenture (as noted earlier) which are consistent with federal and South Carolina law.

Custodial Credit Risk for Investments:

Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty, the Association will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The Association does not have a formal investment policy for custodial credit risk, but follows the guidelines outlined in the Association's Amended Trust Indenture (as noted earlier). As of December 31, 2018, none of the Association's investments were exposed to custodial credit risk.

Credit Risk for Investments:

Credit risk for investments is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The Association does not have a formal investment policy for credit risk but follows the guidelines outlined in the Association's Amended Trust Indenture (as noted earlier) which are consistent with federal and State law.

Concentration of Credit Risk for Investments:

The Association places no limit on the amount the Association may invest in any one issuer. Investments issued by or explicitly guaranteed by the U.S. Government and investments in mutual funds, external investment pools and other pooled investments are exempt from concentration of credit risk disclosures.

NOTE 19C. BONDS PAYABLE:

Upon confirmation by the Bankruptcy Court of and as a means of implementing the Association's Debt Adjustment Plan, on April 21, 2011, the Association issued its 2011 Bonds, consisting of both Serial and Term capital appreciation bonds, in exchange for the Association's 1998 Bonds. At that time, the Association's obligations under the 2011 Bonds were substituted for its obligations under the 1998 Bonds, and the Association was relieved of any further obligations under the 1998 Bonds. The 2011 Bonds were issued to the existing holders of the 1998 Bonds on a pro rata basis, based on unpaid principal and accrued/accreted interest as of the Bankruptcy Petition date of June 24, 2010. The Series 2011A and 2011B Bonds were exchanged for the 1998 Senior Bonds, and the Series 2011C Bonds were exchanged for the 1998 Subordinate Bonds.

The Series 2011A, 2011B and 2011C Term Bonds as originally issued in April 2011 are registered with the Depository Trust Corporation (the "DTC") and are Pro-Rata Term Bonds for which each holder of such Bonds will receive a prorated share of any debt service payment made by the Association on such Bonds. In 2012, the Association effected a mandatory Bond Exchange (with option to retain) of 2011 Pro-Rata Term Bonds for 2011 By-Lot Term Bonds. The 2011 By-Lot Term Bonds are registered with the DTC in a form that allows such Bonds to be traded on the secondary market; however, in accordance with DTC policies and procedures, the distribution of debt service redemption payments made on such Bonds prior to maturity occurs "by-lot" under a lottery system, rather than on a pro-rata basis. Accordingly, holders of the 2011 By-Lot Term Bonds are not assured of the timing of any particular bond payment prior to maturity. The option to retain provision of the Bond Exchange allowed holders of the Association's 2011 Term Bonds to decide whether they would retain their 2011 Pro-Rata Term Bonds as originally issued (the "2011 Retained Term Bonds") and suffer the illiquidity of those obligations, or exchange those Bonds for 2011 By-Lot Term Bonds (the "2011 New Term Bonds") and accept the uncertainty of timing of debt service payments.

The Bond Exchange did not alter the Association's financial obligations under its 2011 Term Bonds.

All of the Association's 2011 Bonds consist of the following. (Descriptions of the Association's Term Bonds have been updated for the Bond Exchange as noted.)

The Association's 2011 Bonds, as updated for the Bond Exchange, consist of:

The 2011 Senior Bonds as follows:

- *Series 2011A Senior Capital Appreciation Toll Road Revenue Bonds* (the "Series 2011A Serial Bonds") are dated April 1, 2011, and originally included eleven serial bonds. The original principal amount at issuance of these serial bonds totaled \$36.6 million. Seven serial bonds remained outstanding following the Association's January 1, 2015 payment of debt service and before 2016 activity. Such remaining outstanding serial bonds mature January 1 of the years 2016 through 2022 inclusive, and accrete interest at rates ranging from 4.75% to 6.00%.
- *Series 2011A Senior Capital Appreciation Toll Road Revenue Bonds* (the "Series 2011A Retained Term Bonds") are dated April 1, 2011, and include three term bonds.
 - The Series 2011A term bonds maturing on January 1, 2032, with an aggregate original principal amount of \$164 thousand are subject to annual pro rata paydown payments on January 1 of the years 2023 through 2031 in varying amounts from \$34 thousand to \$55 thousand, with a payment of \$55 thousand at final maturity on January 1, 2032. Interest accretes on these term bonds at 6.50%.
 - The Series 2011A term bonds maturing on January 1, 2042, with an aggregate original principal amount of \$127 thousand are subject to annual pro rata paydown payments on January 1 of the years 2033 through 2041 in varying amounts from \$64 thousand to \$90 thousand, with a payment of \$90 thousand at final maturity on January 1, 2042. Interest accretes on these term bonds at 7.00%.
 - The Series 2011A term bonds maturing on July 22, 2051, with an aggregate original principal amount of \$73 thousand are subject to annual pro rata paydown payments on January 1 of the years 2043 through 2051 in varying amounts from \$91 thousand to \$113 thousand, with a payment of \$57 thousand (as revised following the extraordinary mandatory prepayments paid on February 15, 2014 and 2019) at final maturity on July 22, 2051. Interest accretes on these term bonds at 7.50%.
- *Series 2011A1 Senior Capital Appreciation Toll Road Revenue Bonds* (the "Series 2011A1 New Term Bonds") are dated April 1, 2011, and include three term bonds.
 - The Series 2011A1 term bonds maturing on January 1, 2032, with an aggregate original principal amount of \$40.5 million and a maturity value of \$149.5 million are subject to mandatory redemption pursuant to payments of sinking fund installments on January 1 of the years 2023 through 2031 in varying amounts from \$8.5 million to \$13.5 million, with a payment of \$13.7 million at final maturity on January 1, 2032. Interest accretes on these term bonds at 6.50%.
 - The Series 2011A1 term bonds maturing on January 1, 2042, with an aggregate original principal amount of \$31.3 million and a maturity value of \$251.0 million are subject to mandatory redemption pursuant to payments of sinking fund installments on January 1 of the years 2033 through 2041 in varying amounts from \$15.7 million to \$22.2 million, with a payment of \$22.3 million at final maturity on January 1, 2042. Interest accretes on these term bonds at 7.00%.
 - The Series 2011A1 term bonds maturing on July 22, 2051, with an aggregate original principal amount of \$18.1 million and a maturity value of \$334.3 million are subject to mandatory redemption pursuant to payments of sinking fund installments on January 1 of the years 2043 through 2051 in varying amounts from \$22.4 million to \$27.9 million, with a payment of \$14.1 million (as revised following the extraordinary mandatory redemptions paid on February 15, 2014 and 2019) at final maturity on July 22, 2051. Interest accretes on these term bonds at 7.5%.

The 2011 Senior Subordinate Bonds as follows:

- Series 2011B Senior Subordinate Capital Appreciation Toll Road Revenue Bonds (the “Series 2011B Retained Term Bonds”) are dated April 1, 2011, and include two term bonds.
 - The Series 2011B term bonds maturing on January 1, 2032, with an aggregate original principal amount of \$57 thousand are subject to annual pro rata paydown payments on January 1 of the years 2014 (following the Association’s January 1, 2013 payment of debt service) through 2031 in varying amounts from \$3 thousand to \$13 thousand, with a payment of \$13 thousand at final maturity on January 1, 2032. Interest accretes on these term bonds at 8.50%.
 - The Series 2011B term bonds maturing on July 22, 2051, with an aggregate original principal amount of \$28 thousand are subject to annual pro rata paydown payments on January 1 of the years 2033 through 2051 in varying amounts from \$15 thousand to \$26 thousand, with a payment of \$15 thousand at final maturity on July 22, 2051. Interest accretes on these term bonds at 9.00%.
- Series 2011B1 Senior Subordinate Capital Appreciation Toll Road Revenue Bonds (the “Series 2011B1 New Term Bonds”) are dated April 1, 2011, and include two term bonds.
 - The Series 2011B1 term bonds, maturing on January 1, 2032, with an aggregate original principal amount of \$13.6 million and a maturity value of \$73.9 million are subject to mandatory redemption pursuant to payments of sinking fund installments on January 1 of the years 2013 through 2031 in varying amounts from \$662 thousand to \$3.1 million, with a payment of \$3.2 million at final maturity on January 1, 2032. Interest accretes on these term bonds at 8.50%.
 - The Series 2011B1 term bonds maturing on July 22, 2051, with an aggregate original principal amount of \$7.0 million and a maturity value of \$226.7 million are subject to mandatory redemption pursuant to payments of sinking fund installments on January 1 of the years 2033 through 2051 in varying amounts from \$3.6 million to \$6.4 million, with a payment of \$3.6 million at final maturity on July 22, 2051. Interest accretes on these term bonds at 9.00%.

The 2011 Junior Subordinate Bonds as follows:

- *Series 2011C Junior Subordinate Capital Appreciation Toll Road Revenue Bonds* (the “Series 2011C Retained Term Bonds”) are dated April 1, 2011, and include term bonds with an aggregate original principal amount of \$18 thousand. These term bonds are subject to annual pro rata paydown payments on January 1 of the years 2013 through 2051 in varying amounts from \$1 thousand to \$7 thousand, with a payment of \$4 thousand at final maturity on July 22, 2051. Interest accretes on these term bonds at 10.00%.
- *Series 2011C1 Junior Subordinate Capital Appreciation Toll Road Revenue Bonds* (the “Series 2011C1 New Term Bonds”) are dated April 1, 2011, and include term bonds with an aggregate original principal amount of \$2.1 million and a maturity value of \$97.8 million. These term bonds are subject to mandatory redemption pursuant to payments of sinking fund installments on January 1 of the years 2013 through 2051 in varying amounts from \$82 thousand to \$793 thousand, with a payment of \$445 thousand at final maturity on July 22, 2051. Interest accretes on these term bonds at 10.00%.

In addition to the regularly scheduled debt service payments described above, the Amended Trust Indenture requires or allows the Association to make additional payments of debt service in certain situations.

The Association is required to make extraordinary mandatory prepayments of its 2011 Retained Term Bonds and redemptions of its 2011 New Term Bonds if any, on January 1, if the 2011 Extraordinary Prepayment Fund, contains in excess of \$50 thousand. In such case, the monies in the 2011 Extraordinary Prepayment Fund shall be applied toward extraordinary mandatory prepayments/redemptions of the 2011 Bonds on the following February 15, at 105% of the accreted value of the respective 2011 Bonds being paid. Extraordinary mandatory prepayments/redemptions shall pay the 2011 Senior Bonds first. If there are no 2011 Senior Bonds outstanding, then the 2011 Senior Subordinate Bonds shall be prepaid/redeemed. If there are no outstanding 2011 Senior

or Senior Subordinate Bonds, then the 2011 Junior Subordinate Bonds shall be prepaid/redeemed. The Association made such extraordinary mandatory prepayments/redemptions in 2014 and 2018.

At any time on or after April 1, 2026, the Association may make optional prepayments of its 2011 Retained Term Bonds or redemptions of its 2011 New Term Bonds at prescribed percentages of such 2011 Bonds' respective accreted values. If the Association makes optional partial prepayments/redemptions of its 2011 Retained/New Term Bonds, the amount of such 2011 Retained/New Term Bonds to be prepaid/redeemed will be selected ratably based upon the accreted values of the outstanding 2011 Retained/New Term Bonds as of the prepayment/redemption date.

Any extraordinary mandatory or optional prepayments of the Association's 2011 Retained Term Bonds will be distributed to Bondholders on a pro-rata basis. Any extraordinary mandatory or optional redemptions of less than all of the Association's 2011 New Term Bonds of a single maturity will be distributed to Bondholders by lot.

The Association's bonds payable activity for the year ended December 31, 2018, was as follows:

(In Thousands)					
	Balances December 31, 2017	Increases	Decreases	Balances December 31, 2018	Amount Due in One Year
Senior Bonds					
Series 2011A Serial Bonds	\$ 29,543	\$ 1,419	\$ 5,427	\$ 25,535	\$ 5,908
Series 2011A Retained Term Bonds	571	39		610	2
Series 2011A 1 New Term Bonds	140,808	9,693	67	150,434	374
Total Senior Bonds	170,922	11,151	5,494	176,579	6,284
Senior Subordinate Bonds:

Junior Subordinate Bonds:					
Series 2011C Retained Term Bonds	29	3	1	30	1
Series 2011C 1 New Term Bonds	3,336	318	154	3,501	167
Total Junior Subordinate Bonds	3,365	321	155	3,531	168
Total Revenue Bonds Payable	\$ 205,470	\$ 14,079	\$ 6,902	\$ 212,646	\$ 7,817

During 2018, increases in bonds payable totaled \$14.0 million and represented accretions on the Association's bonds. Those accretions plus \$3 thousand of accrued premiums (paid as part of the February 2019 extraordinary mandatory prepayments/redemptions of 2011 bonds) were recorded as interest expense; accordingly, total interest expense for 2018 was \$13.5 million. The 2018 decreases in bonds payable of \$6.9 million represented debt service payments that were made in January 2018.

The following schedule summarizes the Association's debt service requirements to maturity as of December 31, 2018. Since all of the 2011 Bonds are capital appreciation bonds, accretions are accounted for as interest expense and additions to principal. For purposes of the following debt service schedule, all accretions are included as principal, and no interest is shown. The amount shown as debt service for 2019 includes the Association's extraordinary mandatory prepayment/redemption paid in February 2019.

(In Thousands)

Year ending December 31:	Principal	Interest	Totals
2019	\$ 7,817	\$ -	\$ 7,817

2049-2051	119,609	-	119,609
	<u>\$ 717,846</u>	<u>\$ -</u>	<u>\$ 717,846</u>

At December 31, 2018, the following accounts established by the Trust Indenture, as discussed in Note 1, were included in the Trust Estate and provided security for the 2011 Bonds. The balances shown below include accruals of year-end interest and any year-end transfers.

(In Thousands)

Trust Account	Amount 2018
2011 Revenue Fund	\$ 49
2011 Debt Service Fund	7,442
2011 Debt Service Reserve	2,037
2011 Extraordinary Prepayment Fund	395
Total	<u>\$ 9,923</u>

The 2011 Bonds are expressly nonrecourse to the Association, the State, the Department, or any agency, department or political subdivision of the State, and are payable solely from the 2011 Trust Estate. The 2011 Bonds are not rated by a national rating agency.

The 2011 Senior Subordinate Bonds are subordinated to the 2011 Senior Bonds in all respects, including in right of payment and priority of liens. The 2011 Junior Subordinate Bonds are subordinated to the 2011 Senior and Senior Subordinate Bonds in all respects, including in right of payment and priority of liens.

If any debt service payment pertaining to any tier of 2011 Bonds is not paid when due, the Trust Indenture prescribes the manner in which subsequent payments of debt service in respect of such tier of 2011 Bonds shall be applied, first, to any arrearages, and, second, to the current debt service owing on such tier of 2011 Bonds. The Trust Indenture specifies that any amounts owing on the 2011 Bonds that are unpaid due to insufficient Distributable Cash, as defined, shall be deferred and bear interest from the date of non-payment at a rate equal to the interest rate or yield on the 2011 Bond to which such unpaid amount relates, compounded annually. The term Arrearages in the Trust Indenture refers to such unpaid amounts plus interest.

If on any 2011 Bond payment date, no 2011 Bonds remain outstanding in any tier, the remaining 2011 Bonds of subordinate tiers will ascend to the next higher tier in the hierarchy described in the New Waterfall in Note 1, item J above. For example, if no 2011 Senior Bonds are outstanding on any 2011 Bond payment date, then any 2011 Senior Subordinate Bonds outstanding will be treated as 2011 Senior Bonds payable from the 2011 Senior Bonds Debt Service Account, and any 2011 Junior Subordinate Bonds outstanding will be treated as 2011 Senior Subordinate Bonds payable from the 2011 Senior Subordinate Bonds Debt Service Account.

The 2011 Bonds are subject to certain bond covenants other than payment covenants. The bond covenants include, but are not limited to, the following:

- The Association is prohibited from taking any action, or omitting to take any action, that would cause the 2011 Bonds to lose their tax-exempt status.

By June 30 of each year, an Association Engineer (as defined) is required to inspect the toll road and submit a report documenting the Association Engineer's findings as to whether the Southern Connector has been maintained by the Department in good repair and any deficiencies in the physical condition of the toll road. The report shall identify any highway maintenance needs of the Southern Connector, an assessment of the materiality of such needs, and may estimate the cost and appropriate timing of such needs. The Association received the latest report from its Engineer in June 2018 and in turn submitted that report to the Association's Trustee and the Department. At the time these financial statements were issued, the 2019 Engineer's inspection was underway.

- On or before April 30, 2016, and once every five years thereafter as prescribed in the Trust Indenture, the Association shall retain an independent traffic and revenue consultant to perform a toll rate study to determine the optimum toll rates to be charged for the Southern Connector. In addition, a toll rate study will be required if (a) the Association fails to make any debt service payment on its 2011 Senior and/or Senior Subordinate Bonds, or (b) the debt service coverage ratio (as defined in the Trust Indenture) for the 2011 Senior Bonds is less than (i) 1.20 for periods ending on or before January 1, 2016, and (ii) 1.25 for periods ending after January 1, 2016, or (c) the debt service coverage ratio (as defined in the Trust Indenture) for the 2011 Senior Subordinate Bonds is less than 1.00 for any period. Despite the above provisions, the Association will not be required to have a toll rate study performed more frequently than once every two years.

Copies of any toll rate study will be presented to the Department, the Trustee and the 2011 Bondholders. Unless the 2011 Bondholders submit an objection in accordance with the terms of the Trust Indenture, the toll rates on the Southern Connector will be set at the optimum toll rates as determined by the traffic and revenue consultant and reported in the toll rate study.

- The Association shall certify to the 2011 Trustee the actual debt service coverage ratios compared to the threshold ratios set forth above. Calculations of the actual debt service coverage ratios shall accompany such certification.
- Prior to the end of each fiscal year, the Association is required to file an annual budget for the next fiscal year with the 2011 Trustee.

The terms of the Amended Trust Indenture provide that any of the following events will be considered an event of default under such Amended Trust Indenture:

- The Association's failure to make any scheduled debt service payment or any mandatory prepayment/redemption of the 2011 Senior Bonds will constitute an event of default. Once all of the 2011 Senior Bonds have been paid, failure to make any scheduled debt service payment or any mandatory prepayment/redemption of the 2011 Senior Subordinate Bonds will constitute an event of default under the Trust Indenture. Once all of the 2011 Senior Bonds and all of the 2011 Senior Subordinate Bonds have been paid, failure to make any scheduled debt service payment or any mandatory prepayment/redemption of the 2011 Junior Subordinate Bonds will constitute an event of default under the Trust Indenture. The Trust Indenture clarifies that the occurrence of an event of default pertaining to any tier of 2011 Bonds as described in this bullet will not automatically cause an event of default with respect to any other tier of 2011 Bonds.

- The Association's failure to perform any covenant other than those relating to payment of the 2011 Bonds will constitute an event of default, if such failure continues 30 days after written notice of the failure has been provided to the Association by the Trustee or to the Association and the Trustee by not less than 25% of the 2011 Senior and/or 2011 Senior Subordinate Bondholders. However, if the Association has taken action to cure such failure within 30 days of receipt of the written notice, the duration of the cure period will be extended to 180 days following the date of the written notice, and no event of default will be deemed to occur, so long as the Association continues to diligently attempt to cure the failure within the 180-day cure period.
- An event of default shall be deemed to occur if the Association (i) voluntarily files a bankruptcy petition or any petition seeking reorganization, readjustment or relief of its debts under federal or State bankruptcy or insolvency act or law; (ii) takes any action consenting to, approving, or acquiescing in any such petition or proceeding; (iii) applies for, or consents to or acquiesces in the appointment of, a receiver or trustee of the Association or for all or a substantial part of its property; (iv) makes an assignment for the benefit of its creditors; or (v) is unable to, or admits in writing its inability to, pay its debts as they come due (except for any inability to make payments due on its 2011 Senior Subordinate or 2011 Junior Subordinate Bonds that would not constitute an event of default under the first bullet above of this paragraph).
- Involuntary bankruptcy proceedings; involuntary petitions seeking reorganization, readjustment or relief of the Association's debts under federal or State bankruptcy or insolvency act or law; or petitions seeking the involuntary appointment of a receiver or trustee of the Association or for all or a substantial part of the Association's property will constitute an event of default if such proceedings or petitions continue undismissed or undischarged for 90 days, or if such proceedings or petitions result in a ruling of bankruptcy or insolvency.

The Trust Indenture does not provide any right to accelerate the maturity of the 2011 Bonds. If an event of default occurs, the 2011 Trustee shall have the right to retain, or cause the Association to retain, (i) an independent consultant to recommend the optimum toll rates for the Southern Connector, and (ii) a management consultant or other third party to examine and make recommendations regarding the Association's operations and operating costs. Unless certain 2011 Bondholders object to the recommendations made by such consultant or other third party, the Association will be required to implement those recommendations to the extent it is able to do so.

The Association monitors the above covenants for compliance throughout the year. The Association believes it was in compliance with and has met its 2011 Bond covenants as of and during the year ended December 31, 2018.

More detailed information pertaining to the Association's 2011 Bonds, including complete copies of the First Amended and Restated Master Indenture of Trust; the First Supplemental Indenture of Trust; and related filings, notices and Court Orders pertaining to the Bond Exchange, may be found on the Association's website, www.SouthernConnector.com under the Bankruptcy Filings link under the Postings arrow.

NOTE 19D. CAPITAL ASSETS:

The Association's interest in its License Agreement with the Department accounted for as an intangible asset relating to the Southern Connector that began generating revenues upon commencement of toll road operations. In order to account for its interest in the License Agreement, the Association capitalized all costs of acquisition and construction of the Southern Connector, including interest expense incurred during the construction period. Upon commencement of toll road operations, the Association began amortizing its interest in the License Agreement.

The following tables summarize the activity related to the Association's Interest in License Agreement with the Department (intangible asset) during the years ended December 31, 2018 and 2017:

(In Thousands)				
Description	Balance December 31, 2017	Additions	Disposals	Balance December 31, 2018
Interest in License Agreement with the Department	\$ 120,041	\$ (3,574)	\$ -	\$ 116,467
Other Depreciable Capital Assets	1,363	(98)	(1)	1,264
Investment in Capital Assets, Net	<u>\$ 121,404</u>	<u>\$ (3,672)</u>	<u>\$ (1)</u>	<u>\$ 117,731</u>

Interest Costs Incurred

Interest costs expensed during the year ended December 31, 2018, totaled \$13.5 million. Interest expense in 2018 included interest accreted on the Association's 2011 Bonds and the accrued premiums paid as part of the extraordinary mandatory prepayments/redemptions.

**SOUTH CAROLINA DEPARTMENT OF TRANSPORTATION
NOTES TO REQUIRED SUPPLEMENTARY INFORMATION
BUDGETARY COMPARISON SCHEDULE
JUNE 30, 2019**

NOTE 1. BUDGETARY FUNDS

South Carolina's Annual Appropriation Act, the State's legally adopted budget, does not present budgets by GAAP fund. Instead, it presents program-level budgets for the following two funds:

General Funds. These funds are general operating funds. The resources in the funds are primarily taxes. The State expends General Funds to provide traditional State government services.

Total Funds. The Total Funds column in the Appropriations Act includes all budgeted resources. Amounts in this column include General Funds as well as most, but not all, federal and department-generated resources. Total funds include portions of certain proprietary and capital project fund activities as well as most special revenue activities but exclude the pension trust funds and some other fiduciary fund activities.

The Department's legally adopted budget is part of the Total Funds budget for the State. It is presented on a combined basis for the Transportation and Infrastructure Maintenance Trust Special Revenue Funds at the program level including the restricted, earmarked, and general funds appropriated to the Department.

NOTE 2. ORIGINAL AND FINAL BUDGETED AMOUNTS; BASIS OF PRESENTATION

The original appropriations presented in the accompanying schedule for the Transportation Special Revenue Fund include amounts in the Appropriations Act as well as any appropriation reductions specifically authorized by law to prevent duplicate appropriations. The terminology, classification, and format of the appropriations section of the accompanying schedule for department's governmental fund are substantively the same as for the legally enacted budget.

The State's General Assembly does not approve estimated revenue or fund balance amounts for Other Budgeted Funds which include the Transportation Special Revenue Fund. However, Section 115 (Recapitulations) of the Appropriation Act includes net source of funds amounts (i.e. estimated cash brought forward from the previous fiscal year plus estimated revenue for the current fiscal year minus estimated cash to be carried forward to the following fiscal year) for three categories of Other Budgeted Funds: Federal, Earmarked, and Restricted. A budget versus actual comparison for the Transportation Special Revenue Fund is presented as required supplementary information.

As operating conditions change, the Department may move appropriations between programs and classifications within programs. However, limits are placed on increasing/decreasing authorizations for personal services without SFAA approval. Also, a revision of budgeted amounts over and above the total revenues appropriated requires approval of the SFAA.

NOTE 3. LEGAL LEVEL OF BUDGETARY CONTROL

The Department maintains budgetary control at the level of summary objective category of expenditure within each program of each department or agency which is the level of detail presented in the accompanying schedule.

NOTE 4. BASIS OF BUDGETING

Current legislation states that the General Assembly intends to appropriate all monies to operate State government for the current fiscal year. Unexpended appropriations lapse on July 31 unless the department or agency is given specific authorization to carry them forward to the next fiscal year. Cash-basis accounting for payroll expenditures is used.

State law does not precisely define the State's basis of budgeting. In practice, however, it is the cash basis with the following exceptions:

- Departments and agencies shall charge certain vendor and inter-fund payments against the preceding fiscal year's appropriations through July 14.
- The gasoline and motor fuel taxes are recorded on the modified accrual basis in accordance with State law.
- All other revenues are recorded only when the State receives the related cash.
- The accrual basis is used for other non-payroll expenditures.

NOTE 5. RECONCILIATION OF BUDGET TO GAAP REPORTING DIFFERENCES

Adjustments of the GAAP basis of accounting to the budgetary basis of accounting consist of primarily of reclassifications from financial statement classifications to budgetary fund categories, the accrual and reversal of accounts payable and payroll and related fringe benefits, which exceed the cut off for the Department to charge the previous fiscal year's appropriations.

Reconciliation of Budget Basis to GAAP Basis Expenditures For The Year Ended June 30, 2019

(in Thousands)

	General Fund	Other Budgeted Funds	Total
Total expenditures, budgetary basis	\$ 14,970	\$ 1,857,087	\$ 1,872,057
